(5) Red civil airway No. 101 is added to read: (Vandalia, Ill. to Evansville, Ind.) From the Loogootee, Ill. omnirng stn to the Evansville, Ind. omnirng stn.

(6) Red civil airway No. 102 is added to read: (Chicago, Ill. to Cincinnati, Ohio) From the Chicago Heights, Ill. omnirng stn via the intsxn of the Chicago Heights omnirng 136° True and the Indianapolis omnirng 347° True enroute radials; the Indianapolis, Ind. omnirng stn to the Cincinnati, Ohio omnirng stn.

(7) Red civil airway No. 103 is added to read: (Indianapolis, Ind. to Findlay, Ohio). From the Indianapolis, Ind. omnirng stn to the Findlay, Ohio omnirng stn.

(8) Red civil airway No. 104 is added to read: (Bradford, Pa. to Elmira, N. Y.) From the Bradford, Pa. non-directional rdo bcn to the Elmira, N. Y. omnirng stn.

(9) Red civil airway No. 105 is added to read: (Pittsburgh, Pa. to Philipsburg, Pa.) From the intsxn of the NE crs of the Pittsburgh, Pa. rdo rng and the W crs of the Altoona, Pa. rdo rng to the Philipsburg, Pa. omnirng stn.

(10) Red civil airway No. 106 is added to read: (Indianapolis, Ind. to Louisville, Ky.) From the Indianapolis, Ind. omnirng stn via the intsxn of the Indianapolis-Cincinnati 15° SW alt change radial and the Louisville omnirng 356(true enroute radial to the intsxn of the Louisville omnirng 356° true enroute radial and the Cincinnati, Ohio omnirng 241° true enroute radial.

(11) Red civil airway No. 107 is added to read: (Huron, S. Dak. to Redwood Falls, Minn. From the Huron, S. Dak. omnirng stn to the Redwood Falls, Minn. omnirng stn.

(12) Red civil airway No. 108 is added to read: (Watertown, S. Dak. to Redwood Falls, Minn.) From the Watertown, S. Dak. omnirng stn to the Redwood Falls, Minn. omnirng stn.

(13) Blue civil airway No. 39 (Knoxville, Tenn.-U. S. Canadian Border) is amended by adding the following portion after "to the Elmira, N. Y. rdo rng stn" to read: From the Elmira, N. Y. omnirng stn to the Syracuse, N. Y. omnirng stn.

(14) Blue civil airway No. 83 is added to read: (Janesville, Wis. to Madison, Wis.) From the Janesville, Wis. omnirng stn to the Madison, Wis. outer mrkr.

CONTROL AREAS: (1) Green civil airway No. 2 control areas is amended to read: (Seattle, Wash. to Boston, Mass.) All of Green civil airway No. 2 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Miles City, Mont. omnirng stn to the Golva, N. Dak. omnirng stn via the direct enroute and 15° N altitude change radials; from the Golva, N. Dak. omnirng stn to the Dickinson, N. Dak. omnirng stn via the direct enroute and 15° N altitude change radials; from the Dickinson, N. Dak. omnirng stn to the Bismarck, N. Dak. omnirng stn via the direct enroute and 15° N altitude change radials; from the Bismarck, N. Dak. omnirng stn to the Jamestown, N. Dak. omnirng stn via the direct enroute and 15° N altitude change radials; from the Jamestown, N. Dak. omnirng stn to the Fargo, N. Dak. omnirng stn via the direct enroute and 15° N alt change radials; from the Fargo, N. Dak. omnirng stn to the Alexandria, Minn. omnirng stn via the direct enroute and 15° NE altitude change radials; from the Alexandria, Minn. omnirng stn to the Minneapolis, Minn. omnirng stn via the direct enroute and 15° NE altitude change radials; from the Minneaplis, Minn. omnirng stn to the La Crosse, Wis. omnirng stn via the direct enroute and 15° NE altitude change radials; from the La Crosse, Wis. omnirng stn to the Lone Rock, Wis. omnirng stn via the direct enroute and 15° NE alt change radials; from the Lone Rock, Wis. omnirng stn to the Milwaukee, Wis. omnirng stn via the direct enroute and 15° N altitude change radials; from the Milwaukee, Wis. omnirng stn to the Muskegon, Mich. omnirng stn via the direct enroute and 15° N altitude change radials; from the Muskegon, Mich. omnirng stn to the Lansing, Mich. omnirng stn via the direct enroute and 15° S altitude change radials; from the Lansing, Mich. omnirng stn via the Lansing-Detroit 15° N altitude change radials to its point of intsxn with the Detroit, Mich. omnirng 343° true enroute radial.

(2) Green civil airway No. 4 control areas (Los Angeles, Calif. to Philadelphia, Pa.) is amended (a) BEFORE the portion which reads: From the Amarillo, Texas omnirng stn...." by ADDING the following portion to read: From the Tucumcari, N. Mex. omnirng stn to the Amarillo, Tex. omnirng stn via the direct enroute and 15° N altitude change radials;" (b) by correcting the portion which reads: "Emporia, Kans. omnirng stn to Kansas City, Mo. omnirng stn via the direct enroute radials;" to read: "Emporia, Kans. omnirng stn to the Kansas City, Mo. omnirng stn via the direct enroute and 15° NW altitude change radials;" (c) by ADDING the following portion to the end of the present control areas: "From the St. Louis, Mo. omnirng stn to the Loogootee, Ill. omnirng stn via the direct enroute and 15° N and S altitude change radials including all that area bounded on the N by Green civil airway 4, on the SW and SE by the St. Louis-Loogootee and the Loogootee-Terre Haute direct enroute radials; from the Loogootee, Ill. omnirng stn to the Terre Haute, Ind. omnirng stn via the direct enroute and 15° N and S altitude change radials; from the Terre Haute, Ind. omnirng stn to the Indianapolis, Ind. omnirng stn via the direct enroute and 15° N alt change radials from the Indianapolis, Ind. omnirng stn to the Dayton, Ohio omnirng stn via the direct enroute and 15° N altitude change radials; from the Dayton, Ohio omnirng stn to the Columbus, Ohio omnirng stn via the direct enroute and 15° N altitude change radial from the Columbus, Ohio omnirng stn to the Pittsburgh, Pa. omnirng stn via the direct enroute and 15° S altitude change radials; from the Pittsburgh, Pa. omnirng stn to the Harrisburg, Pa. omnirng stn via the direct enroute radials; from the Harrisburg, Pa. omnirng stn to the Lancaster, Pa. non-directional rdo bcn via the Harrisburg omnirng direct enroute radial.

(3) Amber civil airway No. 5 control areas (Grand Isle, La. to Milwaukee, Wis.) is amended by adding the following portion to the present control areas: "From the St. Louis, Mo. omnirng stn to the Springfield, Ill. omnirng stn via the direct enroute and 15° NW altitude change radials; from the Springfield, Ill. omnirng stn to the Pontiac, Ill. omnirng stn via the direct enroute and 15° SE altitude change radials; from the Pontiac, Ill. omnirng stn to the Naperville, Ill. omnirng stn via the direct enroute and 15° SE altitude change radials. From the Chicago Heights, Ill. omnirng stn to the Milwaukee, Wis. omnirng stn via the intsxn of the Chicago Heights omnirng 342° true and the Milwaukee omnirng 179° true enroute radials.

(4) Amber civil airway No. 6 control areas (Jacksonville, Fla. to U. S. Canadian Border) is amended by adding the following portion to the present control areas: From the Bowling Green, Ky. omnirng stn to the Louisville, Ky. omnirng stn via the intsxn of the Bowling Green omnirng 48° true and the Louisville omnirng 189° true enroute radials and the 15° E altitude change radials; from the Louisville, Ky. omnirng stn to the Cincinnati, Ohio omnirng stn via the direct enroute and 15° SE altitude change radials; from the Cincinnati, Ohio omnirng stn to the Columbus, Ohio omnirng stn via the intsxn of the Cincinnati omnirng 45° true and the Columbus omnirng 246° true enroute radials; from the Columbus, Ohio omnirng stn to the Mansfield, Ohio omnirng stn via the direct enroute and 15° W altitude change radials; from the Mansfield, Ohio omnirng stn to the Cleveland, Ohio omnirng stn via the direct enroute radials.

(5) Red civil airway No. 3 control areas is amended to read: (Philipsburg, Pa. to Hartford, Conn.) All of Red civil airway No. 3 including all that area 5 miles either side of the direct enroute radials from the Philipsburg, Pa. omnirng stn to the Harrisburg, Pa. omnirng stn.

(6) Red civil airway No. 5 control areas is amended to read: (Sioux Falls, S. Dak. to St. Paul, Minn.) All of Red civil airway No. 5 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Sioux Falls, S. Dak. omnirng stn to the Redwood Falls, Minn. omnirng stn via the direct enroute and 15° SE altitude change radials; from the Redwood Falls, Minn. omnirng stn to the Minneapolis, Minn. omnirng stn via the direct enroute and 15° S altitude change radials including all that area bounded on the SE by Red civil airway No. 5, on the NW by the Redwood Falls-Sioux Falls direct enroute radial and on the NE by the Redwood Falls-Minneapolis direct enroute radial.

(7) Red civil airway No. 11 control areas (Enid, Okla. to Boston, Mass.) is amended by adding the following portion to the present control areas: From the St. Louis, Mo. omnirng stn via the direct enroute and 15° S altitude change radials including all that area bounded on the N by Red 11, on the NE by the Evansville-Loogootee direct enroute radial and on the SW by the St. Louis-Evansville direct enroute radial; from the Evansville direct enroute radial; from the Evansville, Ind. omnirng stn to the Louisville, Ky. omnirng stn via the intsxn of the Evansville omnirng 79° true and the Louisville omnirng 269° true enroute radials and the 15° N altitude change radials. From the Elmira, N. Y. omnirng stn to the Binghamton, N. Y. omnirng stn via the direct enroute radials.

(8) Red civil airway No. 12 control areas (Kansas City, Mo. to Williamsport, Pa.) is amended after the portion which reads: "to the Burlington, Iowa omnirng stn via the direct enroute and 15° S alt change radials" to read: from the Burlington, Iowa omnirng stn to the Bradford, Ill. omnirng stn via the direct enroute and 15° N altitude change radials; from the Bradford, Ill. omnirng stn to the Naperville, Ill. omnirng stn via the direct enroute and 15° S altitude change radials; from the Naperville, Ill. omnirng stn to the South Bend, Ind. omnirng stn via the direct enroute radials and from the Naperville, Ill. omnirng stn to the South Bend omnirng stn via the intsxn of the Naperville omnirng 96° true and the South Bend omnirng 287° true enroute radials; from the South Bend, Ind. omnirng stn to the Litchfield, Mich. omnirng stn via the direct enroute and 15° N and S altitude change radials; from the Litchfield Mich. omnirng stn to the Detroit, Mich. omnirng stn via the direct enroute and 15° N altitude change radials. From the Erie, Pa. omnirng stn to the Philipsburg, Pa. omnirng stn via the direct enroute radials.

(9) Red civil airway No. 14 control areas is amended to read: (Lone Rock, Wis. to Huntington, W. Va.) All of Red civil airway No. 14 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Lone Rock, Wis. omnirng stn to the Janesville, Wis. omnirng stn via the direct enroute and 15° SW altitude change radials including all that area bounded on the SW by Red 14, on the NE by the Janesville-Lone Rock direct enroute radial and on the SE by the Janesville-Moline direct enroute radial. From the Chicago Heights, Ill. omnirng stn to the Lafayette, Ind. omnirng stn via the direct enroute and 15° NE and SW altitude change radials; from the Lafayette, Ind. omnirng stn to the Indianapolis, Ind. omnirng stn via the direct enroute and 15° SW altitude change radials; from the Indianapolis, Ind. omnirng stn to the Louisville, Ky. omnirng stn via the intsxn of the Indianapolis omnirng 170° true and the Louisville omnirng 333° true enroute radials and the 15° SW altitude change radials.

(10) Red civil airway No. 17 control areas is amended to read: (St. Louis, Mo. to Baltimore, Md.) All of Red civil airway No. 17 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Fort Wayne, Ind. omnirng stn to the Findlay, Ohio omnirng stn via the direct enroute and 15° S altitude change radials; from the Findlay, Ohio omnirng stn to the Mansfield, Ohio omnirng stn via the direct enroute and 15° N altitude change radials excluding that portion which overlaps caution areas; from the Mansfield, Ohio omnirng stn to the Bergholz, Ohio non-directional rdo bcn via the Mansfield omnirng direct enroute radial; from the Bergholz, Ohio non-directional rdo bcn to the Pittsburgh, Pa. omnirng stn via the Pittsburgh omnirng direct enroute radial.

(11) Red civil airway No. 18 control areas is amended to read: (Indianapolis, Ind. to Washington, D. C.) All of Red civil airway No. 18 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the atltiude change and enroute radials from the Elkins, W. Va. omnirng stn to the Front Royal, Va. omnirng stn via the direct enroute and 15° S altitude change radials; from the Front Royal, Va. omnirng stn to the Herdon, Va. omnirng. via the direct en route radials.

(12) Red civil airway No. 19 control areas is amended to read: (Goshen, Ind. to Norfolk, Va.) All of Red civil airway No. 19 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Millersburg, Ind. omnirng stn to the Fort Wayne, Ind. omnirng stn via the direct enroute radials; from the Fort Wayne, Ind. omnirng stn to the Dayton, Ohio omnirng stn via the direct enroute and 15° SW altitude change radials.

(13) Red civil airway No. 20 control areas is amended to read: (Lansing, Mich. to Washington, D. C.) All of Red civil airway No. 20 including all that area within 5 miles either side of the enroute radials from the Lansing, Mich. omnirng stn vai the Lansing omnirng 74° true enroute radial to its point of intsxn with the Detroit, Mich. omnirng 343° true enroute radial. From the Cleveland, Ohio omnirng stn to the Pittsburgh, Pa. omnirng stn via the intsxn of the Cleveland omnirng 116° true enroute radial and the Pittsburgh omnirng 320° true enroute radials including all that area bounded on the N by Red 85, on the E by Blue 21 and on the SW by Red 20; from the Pittsburgh, Pa. omnirng stn to the Martinsburg, W. Va. omnirng stn via the direct enroute radials.

(14) Red civil airway No. 26 control areas is amended to read: (Syracuse, N. Y. to Allentown, Pa.) All of Red civil airway No. 26 including all that area within 5 miles either side of the enroute radials from the Syracuse, N. Y. omnirng stn to the Binghamton, N. Y. omnirng stn via the direct enroute radials; from the Binghamton, N. Y. omnirng stn to the Wilkes Barre, Pa. non-directional rdo bcn via the Binghamton omnirng direct enroute radial; from the Wilkes Barre, Pa. non-directional rdo bcn to the Allentown, Pa. omnirng stn via the Allentown omnirng direct enroute radial.

(15) Red civil airway No. 27 control areas is amended to read: (Atlanta, Ga. to Detroit, Mich.) All of Red civil airway No. 27 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Cincinnati, Ohio omnirng stn to the Dayton, Ohio omnirng stn via the direct enroute and 15° W altitude change radials; from the Dayton, Ohio omnirng stn to the Findlay, Ohio omnirng stn via the direct enroute and 15° W altitude change radials; from the Findlay, Ohio omnirng stn to the Toledo, Ohio omnirng stn via the direct enroute radials; from the Toledo, Ohio omnirng stn to the Detroit, Mich. omnirng stn via the direct enroute and 15° W altitude change radials, and from the Toledo, Ohio omnirng stn via the Toledo-Lansing direct enroute radial to its point of intsxn with the W crs of the Detroit, Mich. rdo rng including all that area bounded on the SW by the Toledo-Lansing direct enroute radial, on the N by the Detroit-Litchfield direct enroute radial and on the SE by the Detroit-Fort Wayne direct enroute radial.

(16) Red civil airway No. 28 control areas is amended to read: (Rockford, Ill. to Detroit, Mich.) All of Red civil airway No. 28 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Janesville, Wis. omnirng stn to the Chicago Heights, Ill. omnirng stn via the intsxn of the Janesville omnirng 112° true enroute radial and the Chicago Heights omnirng 340° true enroute radial including all that area bounded on the S by Red 28, on the NW by Red 57 and on the NE by the Janesville omnirng 112° true enroute radial. From the Lansing, Mich. omnirng stn to the Detroit, Mich. omnirng stn via the direct enroute and 15° N altitude change radials.

(17) Red civil airway No. 29 control areas is amended to read: (Rochester, N. Y. to Baltimore, Md.) All of Red civil airway No. 29 including all that area within 5 miles either side of the enroute radials from the Elmira, N. Y. omnirng stn to the Williamsport, Pa. rdo rng stn via the Elmira omnirng direct enroute radial including all that area bounded on the E by Red 29, on the SW by the Elmira-Wilkes Barre direct enroute radial; from the Williamsport, Pa. rdo rng stn to the Selinsgrove, Pa. omnirng stn via the Selinsgrove direct enroute radial; from the Selinsgrove, Pa. omnirng stn to the Harrisburg, Pa. omnirng stn via the direct enroute radials; from the Harrisburg, Pa. omnirng stn to the Baltimore, Md. omnirng stn via the direct enroute radials.

(18) Red civil airway No. 33 control areas is amended to read: (Richmond, Va. to Boston, Mass.) All of Red civil airway No. 33 including all that area within 5 miles either side of the enroute radials from the Allentown, Pa. omnirng stn to the Lancaster, Pa. non-directional rdo bcn via the Allentown omnirng direct enroute radial.

(19) Red civil airway No. 36 control areas is amended to read: (Rochester, Minn. to LaCrosse, Wis.) All of Red civil airway No. 36 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Minneapolis, Minn. omnirng stn to the Rochester, Minn. omnirng stn via the direct enroute radials and 15° W altitude change radials; from the Rochester, Minn. omnirng stn to the LaCrosse, Wis. omnirng stn via the direct enroute and 15° S altitude change radials.

(20) Red civil airway No. 55 control areas is amended to read: (Burlington, Iowa, to Columbus, Ohio). All of Red civil airway No. 55 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Burlington, Iowa omnirng stn to the Peoria, Ill. rdo rng stn via the Burlington omnirng direct enroute radials; from the Peoria, Ill. rdo rng stn to the Pontiac, Ill. omnirng stn via the Pontiac omnirng direct enroute radials; from the Pontiac, Ill. omnirng stn to the Chicago Heights, Ill. omnirng stn via the intsxn of the Pontiac omnirng 56° true and the Chicago Heights omnirng 228° true enroute radials and the 15° SE altitude change radials. From the South Bend, Ind. omnirng stn to the Millersburg, Ind. omnirng stn via the direct enroute radials; from the Millersburg, Ind. omnirng stn to the Findlay, Ohio omnirng stn via

(6-5-51)

the direct enroute radials; from the Findlay, Ohio omnirng stn to the Columbus, Ohio omnirng stn via the direct enroute and 15° SW altitude change radials.

(21) Red civil airway No. 57 control areas is amended to read: (Moline, Ill. to Youngstown, Ohio). All of Red civil airway No. 57 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Moline, Ill. omnirng stn to the Janesville, Wis. omnirng stn via the direct enroute and 15° NW altitude change radials; from the Janesville, Wis. omnirng stn to the Milwaukee, Wis. omnirng stn via the direct enroute and 15° NW altitude change radials; from the Milwaukee, Wis. omnirng stn to the Litchfield, Mich. omnirng stn via the direct enroute radials; from the Litchfield, Mich. omnirng stn to the Toledo, Ohio omnirng stn via the direct enroute radials.

(22) Red civil airway No. 62 control areas is amended to read: (Lansing, Mich. to Altoona, Pa.) All of Red civil airway No. 62 including all that area within 5 miles either side of the enroute radials from the Lansing, Mich. omnirng stn via the Lansing-Toledo direct enroute radial to its point of intsxn with the W crs of the Detroit, Mich. rdo rng. From the Cleveland, Ohio omnirng stn to the Bergholz, Ohio non-directional rdo bcn via the Cleveland omnirng direct enroute radial.

(23) Red civil airway No. 74 control areas is amended to read: (Louisville, Ky. to Dayton, Ohio). All of Red civil airway No. 74 including all that area within 5 miles either side of the enroute radials from the Louisville, Ky. omnirng stn to the Cincinnati, Ohio omnirng stn via the intsxn of the Louisville omnirng 356° true and the Cincinnati omnirng 241° true enroute radials.

(24) Red civil airway No. 84 control areas is amended by changing caption to read: (Lafayette, La. to Atlanta, Ga.)

(25) Red civil airway No. 85 control areas is amended to read: (Dayton, Ohio to Martinsburg, Pa.) All of Red civil airway No. 85 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Dayton, Ohio omnirng stn to the Mansfield, Ohio omnirng stn via the direct enroute and 15° NW altitude change radials.

(26) Red civil airway No. 89 control areas (St. Louis, Mo. to Peoria, Ill.) is amended by adding the following portion to present control areas: from the Quincy, Ill. omnirng stn to the Peoria, Ill. rdo rng stn via the Quincy omnirng direct enroute radial.

(27) Red civil airway No. 100 control areas is added to read: (Chicago, Ill. to Fort Wayne, Ind.) All of Red civil airway No. 100 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Chicago Heights, Ill. omnirng stn tothe Ft. Wayne, Ind. omnirng stn via the direct enroute and 15° S altitude change radials.

(28) Red civil airway No. 101 control areas is added to read: (Vandilia, Ill. to Evansville, Ind.) All of Red civil airway No. 101 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Loogootee, Ill. omnirng stn to the Evansville, Ind. omnirng stn via the direct enroute and 15° NE altitude change radials.

(29) Red civil airway No. 102 control areas is added to read: (Chicago, Ill. to Cincinnati, Ohio). All of Red civil airway No. 102 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Chicago Heights, Ill. omnirng stn to the Indianapolis, Ind. omnirng stn via the Chicago Heights omnirng 136° true and the Indianapolis omnirng 347° true enroute radials; from the Indianapolis, Ind. omnirng stn to the Cincinnati, Ohio omnirng stn via the direct enroute and 15° NE and SW altitude change radials.

(30) Red civil airway No. 103 control areas is added to read: (Indianapolis, Ind. to Findlay, Ohio) All of Red civil airway No. 103 from the Indianapolis, Ind. omnirng stn to the Findlay, Ohio omnirng stn via the direct enroute radials.

(31) Red civil airway No. 104 control areas is added to read: (Bradford, Pa. to Elmira, N. Y.) All of Red civil airway No. 104 from the Bradford, Pa. non-directional rdo bcn to the Elmira, N. Y. omnirng stn via the Elmira omnirng direct enroute radial.

(32) Red civil airway No. 105 control areas is added to read: (Pittsburgh, Pa. to Philipsburg, Pa.) All of Red civil airway No. 105 from the intsxn of the NE crs of the Pittsburgh, Pa. rdo rng and the W crs of the Altoona, Pa. rdo rng to the Philipsburg, Pa. omnirng stn via the Philipsburg omnirng direct enroute radial.

(33) Red civil airway No. 106 control areas is added to read: (Indianapolis, Ind. to Louisville, Ky. All of Red civil airway No. 106.

(34) Red civil airway No. 107 control areas is added to read: (Huron, S. Dak. to Redwood Falls, Minn.) All of Red civil airway No. 107 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Huron, S. Dak. omnirng stn to the Redwood Falls, Minn. omnirng stn via the direct enroute and 15° S altitude change radials.

(35) Red civil airway No. 108 control areas is added to read: (Watertown, S. Dak. to Redwood Falls, Minn.) All of Red civil airway No. 108 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Watertown, S. Dak. omnirng stn to the Redwood Falls, Minn. omnirng stn via the direct enroute and 15° NE altitude change radials.

(36) Blue civil airway No. 2 control areas is amended to read: (Montgomery, Ala. to Erie, Pa.) All of Blue civil airway No. 2 including all that area 5 miles either side of the enroute radials from the Elkins, W. Va. omnirng stn to the Morgantown, W. Va. rdo rng stn via the Elkins omnirng direct enroute radial; from the Morgantown, W. Va. rdo rng to the Pittsburgh, Pa. omnirng stn via the Pittsburgh omnirng direct enroute radial; from the Pittsburgh, Pa. omnirng stn to the Erie, Pa. omnirng stn via the direct enroute radials.

(37) Blue civil airway No. 3 control areas (Tallahassee, Fla. to Sault Ste Marie, Mich.) is amended by adding the following portion to present control areas: from the Evansville, Ind. omnirng stn to the Terre Haute, Ind. omnirng stn via the direct enroute and 15° W altitude change radials; from the Terre Haute, Ind. omnirng stn to the Lafayette, Ind. omnirng stn via the direct enroute and 15° W altitude change radials including all that area bounded on the W and NW by Blue 3 and on the SE by the Terre-Haute-Lafayette direct enroute radials.

(38) Blue civil airway No. 6 control areas (Abilene, Texas to Muskegon, Mich.), is amended by adding the following portion to present control areas: from the Springfield, Ill. omnirng stn to the Peoria, Ill. rdo rng stn via the Springfield omnirng direct enroute radial; from the Peoria, Ill. rdo rng stn to the Bradford, Ill. omnirng stn via the Bradford omnirng direct enroute radial. From the South Bend, Ind. omnirng stn to the Muskegon, Mich. omnirng stn via the direct enroute radials.

(39) Blue civil airway No. 9 control areas (Columbia, Mo. to U. S. Canadian Border), is amended by adding the following portion to present control areas: From the Mason City, Iowa omnirng stn to the Rochester, Minn. omnirng stn via the direct enroute and 15° SE altitude change radials including all that area bounded on the E and SE by Blue 9 and on the NW by the Mason City-Rochester direct enroute radials. From the Minneapolis, Minn. omnirng stn to the Grantsburg, Wis. omnirng stn via the direct enroute radials; from the Grantsburg, Wis. omnirng stn to the Duluth, Minn. omnirng stn via the direct enroute radials.

(40) Blue civil airway No. 11 control areas is amended to read: (Toledo, Ohio to Niagara Falls, N. Y.) All of Blue civil airway No. 11 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Cleveland, Ohio omnirng stn to the Erie, Pa. omnirng stn via the direct enroute and 15° NW altitude change radials.

(41) Blue civil airway No. 13 control areas (Houston, Texas to Minneapolis, Minn.) is amended by adding the following portion to present control areas: From the Mason City, Iowa omnirng stn to the Minneapolis, Minn. omnirng stn via the direct enroute and 15° W altitude change radials.

(42) Blue civil airway No. 15 control areas is amended to read: (Huntington, W. Va. to Erie, Pa.) All of Blue civil airway No. 15 including all that area within 5 miles either side of the enroute radials from the Columbus, Ohio omnirng stn to the Youngstown, Ohio omnirng stn via the intsxn of the Columbus omnirng 51° true and the Youngstown omnirng 231° true enroute radials; from the Youngstown, Ohio omnirng stn to the Erie, Pa. omnirng stn via the direct enroute radials.

(43) Blue civil airway No. 30 control areas (Brownsville, Texas to Amarillo, Texas), is amended by adding a portion BEFORE the portion which reads: "From the Lubbock, Texas omnirng stn...." to read: "from the Big Spring, Texas omnirng stn to the Lubbock, Texas omnirng stn via the intsxn of the Big Spring omnirng 331° true and the Lubbock omnirng 180° enroute radials;"

(44) Blue civil airway No. 31 control areas is amended to read: (Quincy, Ill. to Madison, Wis.) All of Blue civil airway No. 31 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the Quincy, Ill. omnirng stn to the Burlington, Iowa omnirng stn via the direct enroute radials; from the Burlington, Iowa omnirng stn to the Moline, Ill. omnirng stn via the direct enroute and 15° W altitude change radials, including all that area bounded on the E by Blue 31, on the S by Red 12 and on the W by the Burlington-Moline direct enroute radials.

(45) Blue civil airway No. 39 control areas is amended to read: (Knoxville, Tenn. to U. S. Canadian Border). All of Blue civil airway No. 39 including all that area 5 miles either side of the enroute radials from the Philipsburg, Pa. omnirng stn to the Elmira, N. Y. omni-

rng stn via the direct enroute radials; from the Elmira, N. Y. omnirng stn to the Syracuse, N. Y. omnirng stn via the direct enroute radials.

(46) Blue civil airway No. 44 control areas (Advance, Mo. to the U. S. Canadian Border), is amended by adding the following to present control areas: including all that area within 5 miles either side of the enroute radials from the Evansville, Ind. omnirng stn to the Indianapolis, Ind. omnirng stn via the direct enroute radials; from the Indianapolis, Ind. omnirng stn to the Kokomo, Ind. non-directional rdo bcn via the Indianapolis omnirng direct enroute radial; from the Kokomo, Ind. non-directional rdo bcn to the Ft. Wayne, Ind. omnirng stn via the Ft. Wayne omnirng direct enroute radial; from the Ft. Wayne omnirng stn to the Detroit, Mich. omnirng stn via the direct enroute radials, and from the Ft. Wayne Ind omnirng stn to the Toledo, Ohio omnirng stn via the direct enroute radials.

(47) Blue civil airway No. 47 control areas is amended to read: (Front Royal, Va. to Dunkirk, N. Y.) All of Blue civil airway No. 47 including all that area 5 miles either side of the enroute radials from the Philipsburg, Pa. omnirng stn to the Bradford, Pa. non-directional rdo bcn via the Philipsburg omnirng direct enroute radial.

(48) Blue civil airway No. 62 control areas is amended to read: (Ypsilanti, Mich. to Traverse City, Mich.) All of Blue civil airway No. 62 including all that area within 5 miles either side of the enroute radials from the Detroit, Mich. omnirng stn to the Flint, Mich. non-directional rdo bcn via the Detroit omnirng 343° true radial.

(49) Blue civil airway No. 73 control areas is amended to read: (Brookville, Pa. to Buffalo, N. Y.) All of Blue civil airway No. 73 including all that area within 5 miles either side of the enroute radials from the Bradford, Pa. non-directional rdo bcn to the Buffalo, N. Y. omnirng stn via the Buffalo omnirng direct enroute radial.

(50) Blue civil airway No. 83 control areas is added to read: (Janesville, Wis. to Madison, Wis.) All of Blue civil airway No. 83 from the Janesville, Wis. omnirng stn to the Madison, Wis. outer mrkr via the Janesville omnirng 331° true enroute radial.

CONTROL AREA EXTENSIONS: (1) Control area extension (Austin, Texas) is amended to read: All that area within a 25 mile radius of the Austin, Texas rdo rng stn, excluding the Randolph AFB Caution Area.

(2) Control area extension (Burlington, Iowa) is amended to read: All that area within a 15 mile radius of the Burlington, Iowa omnirng stn.

(3) Control area extension (Dayton, Ohio) is amended to read: All that area within a 15 mile radius of the Dayton, Ohio omnirng stn including the area extending 5 miles either side of the west course of the Dayton rdo rng from the rdo rng stn to its intsxn with the NE course of the Indianapolis, Ind. rdo rng and extending from the Dayton ILS localizer 5 miles either side of the localizer course to a point 20 miles SW of the ILS outer mrkr.

(4) Control area extension (Louisville, Ky.) is amended by adding the following to the present control area extension: "and all that area within a 15 mile radius of the Louisville omnirng stn excluding the portion which overlaps the Fort Knox, Ky. Danger Area.

(5) Control area extension (Memphis, Tenn.) is revoked.

(6) Control area extension (Bartlesville, Okla.) is added to read: All that area within a 20 mile radius of Phillips Airport, Bartlesville, Okla.

(7) Control area extension (Ft. Wayne, Ind.) is amended to read: From the Ft. Wayne, Ind. ILS lclzr extending 5 miles either side of the lclzr course to a point 20 miles SE of the outer mrkr, and all that area within a 15 mile radius of the Ft. Wayne omnirng stn.

(8) Control area extension (Minot, N. Dak.) is amended to read: All that area within a 15 mile radius of the Minot, N. Dak. omnirng stn.

(9) Control area extension (Miami, Fla.) is revoked.

(10) Control area extension (Columbus, Ga.) is added to read: From the Lawson AFB rdo rng stn Columbus, Ga. extending 5 miles either side of the SW course of the Lawson AFB rdo rng to a point 20 miles SW of the rdo rng stn.

(11) Control area extension (Bismarck, N. Dak.) is amended to read: All that area within a 15 mile radius of the Bismarck omnirng stn including that area 5 miles either side of the ILS lclzr crs extending from the lclzr to a point 20 miles SE of the outer mrkr.

(12) Control area extension (San Antonio, Texas) is amended to read: All that area within a 60 mile radius of the San Antonio, Texas rdo rng stn.

(13) Control area extension (Evansville, Ind.) is added to read: All that area within a 15 mile radius of the Evansville omnirng stn excluding the portion which overlaps the Camp Breckinridge Danger Area.

(14) Control area extension (Toledo, Ohio) is added to read: All that area within a 15 mile radius of the Toledo, Ohio omnirng stn excluding the portion which overlaps the Erie Danger Area, the Toledo Caution Area and the Grosse Ile Caution Area.

(15) Control area extension (Grantsburg, Wis.) is added to read: All that area within a 15 mile radius of the Grantsburg omnirng stn excluding the portion which overlaps the Shell Lake Caution Area.

The following control area extensions are added to read: All that area within a 15 mile radius of the omnirng stn.: Detroit, Mich.; Aberdeen, S. Dak.; Jamestown, N. Dak.; Janesville, Wis.; Bradford, Ill.; Pontiac, Ill.; Findlay, Ohio; Pittsburgh, Pa.; Millersburg, Ind.; Lafayette, Ind.; Huron, S. Dak.; Redwood Falls, Minn.; Lansing, Mich.; Mason City, Iowa; Rochester, Minn.; Miles City, Mont.; Golva, N. Dak.; Litchfield, Mich.; Springfield, Ill.; Sioux Falls, S. Dak.; Watertown, S. Dak.; Harrisburg, Pa.; Front Royal, Va.; Baltimore, Md.; Syracuse, N. Y.

The following control area extensions are amended by adding to the present control area extension.....and all that area within a 15 mile radius of the omnirange station: Nashville, Tenn.; Columbus, Ohio; Bowling Green, Ky.; Martinsburg, W. Va.; Elkins, W. Va.; Quincy, Ill.; Alexandria, Minn.; Cincinnati, Ohio; Dickinson, Mont.; Fargo, N. Dak.; Indianapolis, Ind.; Lone Rock, Wis.; Minneapolis, Minn.; Muskegon, Mich.; St. Louis, Mo. Moline, Ill.; South Bend, Ind.; Chicago, Ill.; Milwaukee, Wis.; LaCrosse, Wis.; Terre Haute, Ind.

CONTROL ZONES: (1) San Antonio, Texas control zone is amended to read: Within a 5 mile radius of the San Antonio Arpt extending 2 miles either side of the N course of the San Antonio rdo rng to the Cibolo Creek FM.

(2) Columbus, Ga. control zone is added to read: Within a 5 mile radius of the Muscogee County Arpt, Columbus, Ga. extending 2 miles either side of the N course of the Lawson AFB rdo rng to include a 5 mile radius of Lawson AFB, Columbus, Ga. and extending 2 miles either side of the SW course of the Lawson AFB rdo rng from the rdo rng stn to a point 10 miles SW of the rdo rng stn, excluding the portion which overlaps the Ft. Benning Danger Area.

(3) San Antonio, Texas control zone is added to read: Within a 5 mile radius of Randolph AFB, San Antonio, Texas extending 2 miles either side of the SE crs of the Randolph AFB rdo rng to a point 10 miles SE of the rdo rng stn.

REPORTING POINTS: (1) Green civil airway No. 3 (San Francisco, Calif. to New York, N. Y.) is amended BEFORE North Platte, Nebr. by deleting the words: "the intsxn of the SE crs of the Scottsbluff, Nebr. rdo rng and the W crs of the North Platte, Nebr. rdo rng;" and by adding the following compulsory reporting point in lieu thereof: "the Sidney, Nebr. non-directional rdo bcn;"

(2) Green civil airway No. 5 (Los Angeles, Calif. to Boston, Mass.) is amended AFTER "Andrews, Md. rdo rng stn;" by deleting the words: "the intsxn of the SE crs of the Baltimore, Md. rdo rng and the SW crs of the Millville, N. J. rdo rng;" and by adding the following compulsory reporting point in lieu thereof: "The intsxn of the S crs of the New Castle, Del. rdo rng and the SW crs of the Millville, N. J. rdo rng;"

(3) Red civil airway No. 84 is amended by changing the caption to read: (Lafayette, La. to Atlanta, Ga.)

(4) Red civil airway No. 100 is added to read: (Chicago, Ill. to Ft. Wayne, Ind.) No reporting point designation.

(5) Red civil airway No. 101 is added to read: (Vandalia, Ill. to Evansville, Ind.) No reporting point designation.

(6) Red civil airway No. 102 is added to read: (Chicago, Ill. to Cincinnati, Ohio). No reporting point designation.

(7) Red civil airway No. 103 is added to read: (Indianapolis, Ind. to Findlay, Ohio) No reporting point designation.

(8) Red civil airway No. 104 is added to read: (Bradford, Pa. to Elmira, N. Y.) No reporting point designation.

(9) Red civil airway No. 105 is added to read: (Pittsburgh, Pa. to Philipsburg, Pa.) No reporting point designation.

(10) Red civil airway No. 106 (Indianapolis, Ind. to Louisville, Ky.) No reporting point designation.

(11) Red civil airway No. 107 (Huron, S. Dak. to Redwood Falls, Minn.) No reporting point designation.

(12) Red civil airway No. 83 is added to read: (Janesville, Wis. to Madison, Wis.) No reporting point designation.

(13) Other reporting points is amended by adding the following compulsory reporting point: "Graham, Tenn. omnirng stn."

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.
NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . .Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . .Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. .Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. ..VHF middle marker
MOR.. Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL.. Range (loop radiators), power 50 or more, but less than 150 watts
OM. . .VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z . . . .VHF station location marker at a range station.

RADIOTELEGRAPH CODE

A - ABLE	•—	F - FOX	••—•	K - KING	—•—	P - PETER	•——•	U - UNCLE	••—	Z - ZEBRA	——••

FREQUENCY LEGEND

V = 135.9,135.0 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(6-19-51)

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR.
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR the weather minimums for this type of approach must be equal to, or better than the regular (R) minimums as listed in Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

Alt MSL=Min. alt. over airport.

(D) = Day. (N) = Night. → = New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

STATION	TRANSMITS	WEA. MINIMUMS Alt MSL	Ceiling	Visibility	HOURS OF OPERATION REMARKS, ETC.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U. S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U. S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least	F3: 91 oct., and lower
F2: 87 oct., and lower	F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.	C : 73/80 oct.
A : 100/130 oct.	J : JP - 1
B : 91/98 oct.	J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U. S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blind" indicates approaches where glide angle to runway is 5:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AAF - Army Air Field
AFB - Air Force Base
CGAS - Coast Guard Air Station
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux Air Facility
NAAS - Naval Aux Air Station

NOTICES TO AIRMEN

SPECIAL NOTICES

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY:

Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE

121.5				Military emergency

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec. 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

✓ CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-6 dtd Feb. 16, 1949, Akron, Ohio. Change magnetic bearing from rng sta to airport to 066°.

(2) AL-28 dtd Feb. 5, 1951, Augusta (Daniel Fld), Ga. Change initial apch alt to: W crs 2300' from ATL Rng.

(3) AL-37 dtd Nov. 2, 1950, Baltimore (Harbor Fld), Md. Change initial apch alt to: N crs 1800' from int W crs PHL Rng. Change missed apch procedure to: If visual contact not established at authorized landing minimums within 2.4 mi after passing Baltimore Rng Sta, or if landing not accomplished, climb to 1800' on N crs.

(4) AL-70 dtd June 9, 1950, Burlington, Vt. Change initial apch alt to: NW course 2000' from UL Rng, 1000' from Grand Isle FM (Final). Change alternate missed apch to: (when directed by ATC) turn right climb to 2000' on the NW crs Burlington Rng.

(5) AL-218 dtd Feb. 9, 1951, Knoxville (McGhee-Tyson Arpt), Tenn. Change initial apch alt to: W crs 4500' from SMV Rng Sta 3000' from Watts Int.

(6) AL-479 dtd Dec. 29, 1949, Morgantown, W. Va. Change initial apch alt to: NE crs 3600' from int SE crs PIT Rng. Change ceiling over Aerodrome to: 600'. Change Min Alt over Aerodrome to: 1856'.

(7) AL-150 dtd May 3, 1951, McGuire AFB, Fort Dix, N. J. Change initial apch alt to: NE course 1700' from int NE course PHL Rng.

✓ CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) AL-130 dtd Feb. 14, 1950, Ellensburg, Wash. Change LF rng freq from 385 to 379 kc.

(2) AL-45 dtd Apr. 18, 1950, Bellingham, Wash. Change LF rng frq from 391 kc to 362 kc.

(3) AL-142 dtd Apr. 27, 1951, Everett, Wash. Change LF rng frq from 371 kc to 385 kc.

(4) AL-5 dtd Oct. 7, 1949, Akron, Colo. Change initial apch alt to: S crs, minimum en route alt.

(5) AL-335 dtd Mar. 29, 1951, Pueblo, (Mun #1 Arpt) Colo. Change alternate missed apch to: (when directed by ATC) climb to 7000' on N crs within 25 mi.

(6) AL-582 dtd Nov. 7, 1950, Seattle (Seattle-Tacoma Intn'l Arpt), Wash. Change initial apch alt to: NW crs 2000 from Port Gamble Int.

(7) AL-424 dtd Apr. 26, 1951, Forbes AFB, Topeka, Kans. Change alternate missed apch to: (when directed by ATC) turn left to heading of 270°, climb to 2400' on NW crs within 25 mi; or turn right to heading of 180°, climb to 2400' on SE crs within 25 mi.

(6-19-51)

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous condition, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian terriroty.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

VHF OMNITEST SIGNAL FACILITIES: Experimental VHF omnitest signal facilities have been installed at the New York (LaGuardia 112.0 mc), Chicago (Midway 112.0 mc), and Kansas City (Municipal 113.0 mc) airports. These facilities cannot be used for navigational purposes but permit checking of aircraft navigational VOR receivers during a ramp test or while in flight near the airport. Voice communication is not available on the test signal frequency. The facility radiates a 0° course in all directions with a power output of about 10 watts. The identification consists of continuous dots without voice. Each facility is continuously monitored and will shut down automatically if the 0° course varies by more than one degree from normal or in case the identification fails. Flight checks indicate that the omnitest signal is usable to a distance of about ten miles at minimum instrument altitude although regions of weak and unreliable signal may be encountered at shorter distances. The omnitest signal may be regarded as dependable when there is no flag alarm showing or where no flag alarm is incorporated in the aircraft unit and the identification is received free from interference and noise. Comment from airmen will be appreciated. Please forward same to: Civil Aeronautics Administration, Washington 25, D. C., Attention: W-380.

RECEIVER OMNITEST PROCEDURE - Receivers with omni-Bearing Selectors (OBS)

Tune in omnitest frequency. The "To-From" indicator should read "To" or "From" and the alarm flag, if one is used, should disappear.

Set OBS in vicinity of 0° to center "Deviation" indicator. The "To-From" indicator should read "From" and the difference between 0° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

Set OBS in vicinity of 180° to again center "Deviation" indicator. The "To-From" indicator should read "To" and the difference between 180° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

With the "Deviation" indicator centered in the 180° position rotate OBS clockwise until "Deviation" indicator reads full scale or five dots to left. Note OBS reading. Next rotate OBS counterclockwise until "Deviation" indicator reads full scale or five dots to right. Note OBS reading. The difference between the two OBS readings is a measure of receiver course sensitivity.

If instrumentation includes a radio magnetic indicator (RMI), the pointer on this instrument connected to the receiver being checked should be observed. This pointer should indicate 180° ± 1 degree regardless of the setting of the OBS.

AUTOMATIC INDICATING RECEIVERS: Automatic indicating receivers do not have an Omni-Bearing Selector or a "To-From" indicator and have no ambiguity. The only course that can be checked is the one indicated when the equipment is receiving the 0° (magnetic north) radial from the station, which is automatically indicated when the receiver is turned on and tuned to the correct signal frequency. Either 0° or 180° will be indicated depending on the sensing designed into the particular receiving equipment (as described in the instruction book for that equipment).

✓ FLIGHT INFORMATION MANUAL: A new edition of this manual has been prepared and is now being printed. This issue, Volume 5, Number 1, will supersede that dated August 1, 1950, and should be ready for distribution to subscribers shortly after July 1.

FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no over-flights of foreign territory should be made without authorization from the foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtain countries.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot. (6-19-51)

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed:

Radio Call	Frequency	Commissioned
Atlanta Center	120.3 mc	July 1, 1950
Boston Center	120.3 mc	Jan. 22, 1951
Chicago Center	120.3 mc	May 10, 1949
Cincinnati Center	120.3 mc	Mar. 28, 1951
Cleveland Center	120.3 mc	Nov. 3, 1950
Detroit Center	118.9 mc	Dec. 21, 1950
Ft. Worth Center	120.3 mc	April 29, 1951
Kansas City Center	120.3 mc	Feb. 8, 1951
New York Center	120.3 mc	Oct. 11, 1950
	120.7 mc	Jan. 25, 1950
Oakland Center	120.3 mc	Oct. 30, 1950
Pittsburgh Center	118.9 mc	Nov. 2, 1950
St. Louis Center	118.9 mc	Mar. 15, 1951
Salt Lake Center	120.3 mc	Jan. 24, 1951
San Antonio Center	120.3 mc	April 17, 1951
Seattle Center	120.3 mc	March 8, 1951
Washington Center	120.3 mc	Sept. 1, 1949

ON-REQUEST REPORTING POINTS: Effective immediately, the following on-request reporting point is established: BRACEY INTSXN - Intsxn of the NE crs of Raleigh, N. C. and the NW (aural) crs of Rocky Mount, N.C. Effective immediately the ORANGE on-request reporting point (intsxn NE crs Willow Grove, Pa. and W crs Newark, N. J.) is deleted.

AIR ROUTE TRAFFIC CONTROL AND FLIGHT ADVISORY AREA BOUNDARY AMENDMENTS: Effective July 15, 1951 air route traffic control and flight advisory area boundaries were amended as follows:

DETROIT air route traffic control boundary was amended to include Blue Civil Airway No. 3. From a point twenty-five (25) miles north of the Pellston, Michigan non-directional radio beacon to the Sault Ste. Marie, Michigan Low Frequency Radio Range Station. Red Civil Airway No. 23, from a point twenty-five (25) miles SE of the Sault Ste, Marie, Michigan Low Frequency Radio Range Station to the International Boundary NW of the Houghton, Michigan Low Frequency Radio Range Station.

DETROIT-CHICAGO flight advisory boundary amended as follows: Starting at the Michigan Wisconsin State border at the 87th Meridian and continuing generally westward along the Michigan-Wisconsin State border to the eastern boundary of the Minneapolis Air Route Traffic Control Center Flight Advisory Area at the 90th Meridian; all that area N of the Michigan-Wisconsin State border to the International Boundary will be additional Detroit Air Route Traffic Control Center Flight Advisory Area.

INSTRUMENT APPROACH PROCEDURES: The standard instrument approach procedures for the following airports have been CANCELLED: Automatic Direction Finding: Atlantic, Iowa, Atlantic Arpt. Minneapolis, Minn., Minneapolis-St. Paul Intn'l Arpt.

INSTRUMENT APPROACH PROCEDURES: The standard instrument approach procedures for the following airports have been CANCELLED: Low Frequency Range: (1) Inyokern, Calif., Inyokern NAF, effective April 2, 1951. (2) Smithville, Tenn., Smithville Arpt., effective May 11, 1951. VHF (VAR) Radio Range: Santa Barbara, Calif., Santa Barbara Arpt., effective May 11, 1951. Automatic Direction Finding: Camarillo, Calif., Camarillo-Ventura Co. Arpt., effective May 11, 1951.

DANGER AREA DESIGNATIONS: The following Danger Area amendments shall be effective as dated unless otherwise advised:

AMENDMENT NO. 74 (June 19, 1951)

1. The Huntsville, Alabama, area, published on April 21, 1949, in 14 F.R. 1913, and revised on October 18, 1950, in 15 F.R. 6962, is further revised to read: Location: Huntsville (Chattanooga Chart); Description: Beginning at lat. 34-39-21 N, long. 86-35-30 W; S to lat. 34-35-11 N, long. 86-35-51 W; W to lat. 34-35-26 N, long. 86-42-01 W; NNW to lat. 34-42-00 N, long. 86-44-30 W; due E to long. 86-41-30 W; S to lat. 34-39-36 N, long. 86-41-40 W; E to lat. 34-39-21 N, long. 86-35-30 W, point of beginning. Altitudes: Surface to unlimited. Time: Continuous. Using Agency: Dept. of the Army, Redstone Arsenal, Huntsville, Alabama.

2. The Bethany Beach, Delaware, area, published on January 18, 1951, in 16 F.R. 455, is amended by changing the "Description by Geographical Coordinates" to read: "Beginning at lat. 38-36-50 N, long. 74-59-50 W; Southerly paralleling the shoreline at a distance of 3 nautical miles to lat 38-23-05 N, long 74-59-35 W; westerly following the arc of a circle with a radius of 20,000 yards centered at lat. 38-32-30 N, long. 75-03-15 W to lat. 38-22-40 N, long. 75-01-35 W; northerly to lat. 38-28-00 N, long. 75-02-40 W; due W to long. 75-05-00 W; due N to lat. 38-30-30 N; NE to lat. 38-36-50 N, long. 74-59-50 W, point of beginning.

3. A Helmville, Montana, temporary area is added to read: Location: Helmville (Butte Chart); Description: N boundary: lat. 46-52-30 N; E boundary: long. 112-52-30 W; S boundary: lat. 46-46-15 N; W boundary: long. 113-00-00 W. Altitudes: Ground to 25,000 feet, M.S.L. Time: Continuous, June 19, 1951 through June 28, 1951; Using Agency: Montana National Guard, Helena, Montana.

4. A Camp Tortuguero, Puerto Rico, area is added to read: Location: Camp Tortuguero (WAC 649); Description: Beginning at lat. 18-27-40 N, long. 66-24-54 W; due S to lat. 18-27-09 N; W to lat. 18-27-16 N, long. 66-28-07 W; due N to lat. 18-28-15 N; ENE to lat. 18-28-43 N, long. 66-26-42 W; SE to lat. 18-27-40 N, long. 66-24-54 W, point of beginning; Altitudes: Surface to 5000 feet; Time: Daylight hours only; Using Agency: Dept. of the Army, San Juan, P.R.

5. A Salinas, Puerto Rico, area is added to read: Location: Salinas (WAC 649); Description: Beginning at lat. 18-03-03 N, long. 66-14-26 W; SSW to lat. 18-00-12 N, long. 66-15-10 W; SW to lat. 17-59-07 N, long. 66-17-32 W; WNW to lat. 18-01-40 N, long. 66-20-15 W; NE to lat. 18-04-22 N, long. 66-17-05 W; ESE to lat. 18-03-55 N, long. 66-15-25 W; SE to lat. 18-03-03 N, long. 66-14-26 W, point of beginning; Altitudes: Surface to 6000 feet above terrain; Time: Continuous; Using Agency: Dept. of the Army, Salinas, P.R.

AERONAUTICAL CHART CORRECTION: Correct RF Chart #24, dtd May 11, 1951 by deleting transmitting and receiving freq of 121.5 mc at Akron (Municipal), Ohio control tower

---

CORRECTIONS TO AIRMAN'S GUIDE: Correct Airman's Guide, Vol. 6, No. 6, dtd June 5, 1951, as follows:

(1) Page 93. Correct Item 6, line 3, Red 102, by changing the Indianapolis omnirng radial to "342° true" instead of 347°.

(2) Page 94. Correct Item 8, line 8, Red 12 control areas, by changing the Naperville omnirng radial to "89° true" instead of 96°.

(3) Page 94. Correct Item 14, Red 26 control areas by changing name of facility at Wilkes Barre, Pa. to "radio range station" instead of "non-directional radio beacon".

(4) Page 95, Correct Item 29, line 5, Red 102 control areas, by changing Indianapolis omnirng radial to "342° true" instead of 347°.

(5) Page 96. Under the added control area extension list captioned "All that area within a 15 mi. radius of the omnirng station", amend to include the following: "Mansfield, Ohio".

(6) Page 96. Correct item 10, control area extensions, by adding to the Columbus, Ga. control area extensions: ...excluding the portion which overlaps the Ft. Benning Danger Area.

(7) Page 96. Correct line 10, Baltimore, Md. control area extension by adding:...excluding that portion which overlaps danger areas.

(8) Page 96. Correct line 14, control area extensions, by changing Dickinson, Mont. to Dickinson, N. Dakota. (6-19-51)

MAGNETIC VARIATION CHANGES: The following change in magnetic variation is the result of the application of 1950 isogonic lines to aeronautical charts: The new magnetic courses for this range is shown in the listings in the Air Nagigation Radio Aids Section. Station: Princeton (VOR), Maine; Present Variation: 20 W; Old Variation:: 21 W.

CHANGES IN WEATHER REPORTING FORM

Weather Broadcasts by CAA Communications Stations - Effective June 1, 1951, weather broadcasts from CAA Communications Stations will reflect certain changes in the form of aviation weather reports which are being made effective by the U. S. Weather Bureau as of that date. The new weather report form will list multiple cloud layers in ascending order of height, and changes noted in broadcast phraseology will be principally for the purpose of describing the cloud and ceiling conditions as reported. In this connection, it is recommended that all interested persons obtain from the U. S. Weather Bureau the pamphlet, "What's the Ceiling?", which explains in detail the improvement in form of aviation weather reports.

The principal changes covered in this pamphlet are as follows:

1. All cloud layers will be reported in ascending order of height.
2. Thin cloud layers will not be reported as a ceiling.
3. All ceiling layers will be identified by a letter designator.
4. "X", "-X" will be used to report obscurations on the ground only.
5. Peak gusts of wind will be reported immediately following the current wind speed rather than in remarks.
6. Intensity classification for wind shifts and squalls have been discontinued.
7. A new precipitation intensity "very light" has been established. The new teletype abbreviation for this intensity is "minus minus".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

[redacted]: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (3-19)
ANNISTON-RADIO: Omnirng gnd checked only. (4-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions.
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. (5-23) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS.
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will let down S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
EVERGREEN-RADIO: June 5, omnirng shut down until approx July 20 - modernization.
★ GADSDEN-RADIO: Bear., dist H fac to Gadsden Arpt: 240°, 2.5 mi. (5-29)
MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng crs have multiples 20 mi from stn. (5-10)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20) Rnwy 5-23 clsd (const)(5-7)
MONTGOMERY-RADIO: Omnirng figt-checked. A maximum of one half degree in excess of allowable error will be found in E sector between radials 90° and 118°. (6-14)
[redacted]: MUSCLE SHOALS ARPT: Lgts on Rnwys 6-24, 18-36 inop. (3-19)
TUSCALOOSA-RADIO: Omnirng gnd checked only, awaiting figt-check. (6-8)
TUSCALOOSA-VAN DE GRAAFF ARPT: Use paved Rnwy 11-29 at own risk. Use sod area N of and parallel to paved rnwy. Apron under const. (5-29)
[redacted]: DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (4-2)
** GLENDALE-FRAM ARPT: Correct lat 33-31 -45, long. 112-16-30. (4-23)
HASSAYAMPA-RADIO: Soon omnirng will be commd. Freq: 115.9 mc. Ident: HYM. Lctd lat 33-27-00, long. 112-50-05. Class will be: VORW. Monitoring category (3). (5-22)
LUKE AFB (PHOENIX): Ctn - exten const all rnwys. (2-19) Rnwy 3-21 clsd (const). (5-2)
PHOENIX SKY HARBOR ARPT-TOWER: From Mar 26, until approx June 26. rdo equip being moved to new twr. During this period short interruptions. (3-14)
** THEBA-GILLESPIE ARPT: Correct lat 32-54-30, long. 112-53-45. (4-17)
[redacted]: BENTON ARPT: W half N/S Strip clsd (const). (6-12)
BENTONVILLE ARPT: 51' bcn twr being erected E side adj to N end of hangar. (4-13)
BRINKLEY-FEDERER MEMORIAL ARPT; SITE 37, DAL-LOU: Clsd ngts. Rows of dirt on SW end NE/SW Strip, use emerg only. (5-17)
FAYETTEVILLE RADIO: May 1, omnirng shut down until approx July 20-modernization.
FAYETTEVILLE ARPT: 75' twr being erected NW corner between hangar and hwy. (5-8)
★ FLIPPIN-RADIO: June 18, INSAC comm. Transmitting 115.1;111.1,135.0,135.9,121.5 mc, 206 kc; rcvg 3105kc; 121.5,122.1,126.7,135.9 mc. Class: BVOR-DTVJ. Monitor. category (1). Data rcvd too late for inclusion on ANRA page.
FT. SMITH ARPT: Equip on W end E/W Rnwy. (4-9)
LITTLE ROCK-ADAMS FLD-TOWER: Transmission and reception poor on all VHF freqs S to W account obsts near temp twr until approx Aug 1. Apch ctl on 353 kc shut down until Aug 1. (6-8) FLD: Ctn lndg N or NE, vision of ctl twr partially obstd. (5-14) Lmtd NG svcg. (10-24)
★ PINE BLUFF-RADIO: Bear., dist VOR to Grider Arpt: 179°, 4.9 mi. (6-1)
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
[redacted]: ARCATA ARPT: Ctn - const. (6-8)
BAKERSFIELD-RADIO: June 7, omnirng resumed opern. Slight to moderate scalloping in SE quad 80° to 123°.
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft xcpt on special projects for modification. (7-3) Clsd to all trans jet acft. (11-20)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Figt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR wea conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (3-13)
★ COALINGA-RADIO: June 13, omnirng commd. Freq 114.6 mc. Ident: CLG. Stn: Lctn: lat 36-16-12, long. 120-06-36. Monitoring category: (3). Class; VORW.
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
CRESCENT CITY-DEL NORTE CO. ARPT: Drifting sand across W end taxi strip leading to Rnwy 11. Use rnwy for taxying only. (5-18)
CULVER CITY-HUGHES ARPT: Entire fld clsd xcpt NW half Strip 4-22. Usable portion mrkd day, ngt. Clsd trans acft xcpt on prior permission. (3-9)
EDWARDS AFB (MUROC): Lctd within a danger area. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (4-23)
FORT ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white. (10-24)
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (3-11)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (6-3)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (4-5)
** LANCASTER-QUARTZ HILL ARPT: Correct lat 34-39-00, long. 118-12-15. (1-29)
** LENWOOD-RILEY FLD: Correct lat 34-51-15, long. 117-07-45. (5-9)
LOS ANGELES-RADIO: Visual-aural rng has moderate scalloping in N sector. (6-13)
LOS ANGELES-AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: About June 15, transmitter and rcvr 120.3 mc will be commd. (5-7)
LOS ANGELES INTERNATIONAL ARPT-TOWER: Effect. Apr 9, until approx July 1 voice

CALIFORNIA: communs may be interrrupted for short periods during new twr const. About June 27 until approx July 9, ASR and PAR will be inop. PAR will also serve Rnwy 25R when it resumes opern from new twr lctn. About July 6, lclzr opern will be transferred from Rnwy 25L to Rnwy 25R. Lctn 1100' W of apch end of Rnwy 25R aligned on centerline. (6-15) FLD: Rnwy 4-22 clsd (const). Rnwy 7L-25R usable portion 4500' from apch end 25R Const across W end Rnwy 25R, 100' crane, equip. on and adj const area. Use paved areas only. Rnwy 25R clsd take-offs. Rnwy 7L clsd lndgs 0700-1700 daily xcpt Sat and Sun. Two green transverse bar lgts mrk threshold Rnwy 25L. Because of new twr const approx 1/2 mi of tfc pat. S of arpt not visible to twr controllers. (6-14)

LOS BANOS ARPT: Clsd (const). (6-7)

** LUCERNE VALLEY-DOUBLE J RANCH ARPT: Correct lat 34-27-00, long. 116-50-15. (2-2)

MATHER AFB-TOWER: USAF GCA inop. (4-28)

MARCH AFB (RIVERSIDE): Formations more than 18 acft expect delay more than 1 hr. (1-15)

MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (2-21)

NEEDLES ARPT, SITE 25A, LAX-AMA: 80 octane gas not avail. (6-15) These data rcvd too late for inclusion of + in Directory of Arpts.

NORTON AFB (SAN BERNARDINO): Ctn-equip on fld days. (3-29)

OAKLAND-RADIO: Omnirng maximum usable dist, 40 mi N thru E at minimum instr alt. (6-18)

OAKLAND ARPT: Rnwy 6-24 clsd. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. (3-8) New 100' ctl twr under const. (6-18)

** CLARK'S DRY LAKE FLD (SALTON SEA): Correct lat 33-20-00, long. 116-16-45. (3-6)

SAN DIEGO-RADIO: Omnirng figt-checked, operns normal. Light to moderate scalloping in all quads. (6-12)

SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat., due to joint operns with Navy. Lgt acft ind on blacktop only. No operns Sat, Sun, or holidays. (4-30)

SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft ind on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (2-21)

** SAN DIEGO NAS SEAPLANE BASE: Fuel: A+BCJ3. Bcn, waterlane lgts. Major acft and engine rprs. Do not cross tfc pat. at North Island or fly over Amphibious Base, Pt. Loma or Coronado at any time below 1500'. (3-30) Sealane mrkrs under const. Perm pile-mounted day mrkrs and seadrome lgts are being installed in S San Diego Bay to delineate the sealanes. There are two sealanes each 1000' wide, extending NW/SE; 14, 875'; E/W, 9,878'. Bndrys and ends of lanes mrkd, day, ngt. Ctn during lndg and take-off. It is also noted that due to mrkrs being pile-mounted the height above water will vary with the state of tide.

SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)

SAN FRANCISCO ARPT-TOWER: CAA ILS Lclzr operg with slight scalloping. (1-26) FLD: Apch lgts inop. Rnwys clsd days intermittently. Turf area clsd. Equip on fld. (1-26) Const on apron adj Intnl Terminal, mrkd. Taxi with ctn. (5-17)

** SANTA ANA MCAF-LTA: Change lctn ident to: HNG. (5-1) Hrs opern: 0800-1630, Mon-Fri and to sunset on 30 min req. 0800-1200, Sat and to sunset on 30 min req. 0800 to sunset Sun on 30 min req. (5-18)

SANTA BARBARA-RADIO: Soon omnirng will be commd. Freq: 114.9 mc. Ident: SBA. Lctd lat 34-30-36, long. 119-46-13. Class will be: VORW. (6-8)

SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end Rnwy 25 perm clsd to acft with 20,000 lbs or more gross wt. Threshold lgts Rnwy 7 inop. Extension apch end Rnwy 7 usable days only. (6-1)

SANTA MONICA ARPT: 16'' elevated lgts being installed both sides Rnwy 3-21. Rnwy 4-22 clsd. Rnwy 3-21 hazardous-const. (3-29)

SONORA-COLUMBIA ARPT: Clsd (const). (6-8)

THERMAL-RADIO: Soon omnirng will be commd. Freq: 114.3 mc. Ident: TRM. Lat 33-37-35, long. 116-09-45. (5-29)

[redacted]CALIFORNIA: ✱TRAVIS AFB (FAIRFIELD)-TOWER: USAF ILS resumed cont opern. Lclzr channel changed from Z to Channel V, freq 108.7 mc without voice. (6-4)

**VICTORVILLE-CIRCLE M GUEST RCH ARPT: Correct lat 34-27-00, long. 117-12-00. (5-9)

COLORADO: COLORADO-SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U. S. Army Dist Engr. John Martin Dam lctd 1 mi SSE of Hasty, Colo. (9-25)

**CRAIG ARPT: Correct lat 40-29-30, long. 107-31-30 (6-4)

DENVER-AIR ROUTE TRAFFIC CONTROL CENTER: Soon transmitter and rcvr 120.3 mc will be commd. (6-8)

DENVER NAS (BUCKLEY FLD)-RADIO: Navy X-band Radar Bcn, code 2-1-1, inop (4-26)

LAMAR-RADIO: Omnirng radials displaced counterclockwise as follows: 345° to 15° 4°, 142° to 150° 4°, 183° to 216° 6°. (6-15)

PUEBLO: Ordnance depot approx 17 mi E at lat 28-16-53 long 104-18-09, conducting all types of demolition work 0800-1630 daily, Mon thru Fri, during month of June (5-31)

PUEBLO-RADIO: Omnirng radials from 342° to 50° displaced up to 6° clockwise Radials from 105° - 190° displaced up to 5° counterclockwise. (6-15)

[redacted]: BRIDGEPORT ARPT: Const ends Rnwys 6, 11 and 16. First 1000' of these rnwy ends subject to closure with min notice. Equip on fld. (4-14)

HARTFORD-RADIO: Auto. rng monitor discontd. (2-21)

E. HARTFORD-RENTSCHLER ARPT: VFR flight test operns days all alts in 75 mi radius. (1-4) 80' crane 500' NW apch end Rnwy 4 days. (5-14)

NEW HAVEN ARPT: Taxi strip from Admin Bldg to N end Rnwy 1-19 clsd. Const N end Rnwy 1-19. Arpt clsd on June 25, 26, 27, 28 and 29. (6-15)

WESTPORT SEAPLANE BASE: Clsd to all trans acft. No svcg avail. (6-1)

[redacted]: DOVER AFB-RADIO: USAF rng gnd-checked only. Reliable for homing only. (12-12)

DOVER-JUNGLO FLD: Hwy const adj to the W. (6-13)

FORT MILES: Overwater Controlled Firing Area in vcnty formerly approved on a seasonal basis, is now rqrd on a yearly basis. Area is described as follows: Beginning at lat 38-45-30, long. 75-01-24; SE to lat 38-43-00, long. 74-57-10; SSE to lat 38-38-50, long. 74-55-33; W to lat 38-37-54, long. 75-03-50; northerly along the shoreline at lat 38-40-45, long 75-04-09; NE to point of beginning. Time of Use: Jan to April 0800-1730, May to Oct 1300-1900, Nov to Dec 0800-1730. Activities: Anti-acft firing. Controlling Agency: 2nd Army, Ft. Miles, Dela. Effective Date: Jan 5, 1951.

WILMINGTON-RADIO: 3 mrkr operg test-basis only. (5-16)

WILMINGTON-NEW CASTLE CO. ARPT-TOWER: Soon CAA ILS will be shut down until approx June 18. Lclzr and glide path freq will be changed 110.1 mc 334.4 mc, respectively (6-1) FLD: Jets and other mil acft operg daily. Two 465' unlgtd bridge twrs being erected across Delaware Riv 4 mi ENE. (3-23)

[redacted]: ANACOSTIA NAS-RADIO: Navy VHF/DF inop - repairs. (4-30)

ANACOSTIA NAS: All pilots clearing to Anacostia NAS under IFR should be thoroughly familiar with all Washington area rdo and commurs facs, the reporting points, all holding pats, and let down procedures, incig "TIMED APCHS" (11-1)

WASHINGTON-RADIO-SPECIAL NOTICE: The following facs are to be used as an aid to any acft, military or civilian, that is known or believed to be in distress:

SEATTLE NAS: Acft in tfc are rstd from flgt over the area W of centerline Rnwy 14-32. Rnwy 14-32 lgtd 30 min prior to arrivals between sunset and sunrise and on req. (2-21)
SEATTLE-TACOMA INTERNATIONAL ARPT-TOWER: Lclzr and glide path shut down - rnwy const. (6-6) FLD: Ctn-Rnwy 16 under const. Threshold lgts removed from N end Rnwy 16. 3 green lgts spaced 20' intervals each side rnwy. 100' S of N end. Equip on fld. (4-4)
SHELTON-RADIO: LF rng on 362 kc has limited usable crs dist as follows: S crs 35 mi, SW and N 30 mi each. (1-5)
SPOKANE-FELTS FLD: Take-off and lndgs will be made on rnwy most nearly aligned with wind cone S side of fld. When wind cone points 90° to rnwy, take-off and lnd to the W. Lgt acft use rectangular tfc pat and mrkd area S of rnwy. Equip on fld. (10-9)
SPOKANE-GEIGER FLD-TOWER: Interference on LMM freq 201 kc. (12-21) Back Course narrow with unflyable bends. (2-26) FLD: Ctn-const both sides Rnwy 2-20. Open ditch across ends and sides of rnwy. Open ditch W side ramp, mrkd. Taxiway between Rnwys 2 and 34 clsd. Ctn-taxying at intsxns. Equip on fld. 2-way rdo rqrd. (5-14)
WHIDBEY ISLAND NAS: Rnwys at Ault Fld are black asphaltic concrete and have a capacity of 25,000 lbs. per wheel if tire pressure is under 85 lbs; or 35,000 lbs. if tire pressure is over 85 lbs. (2-21)
YAKIMA-RADIO: June 16, omnirng flgt-checked, opers normal. (6-17)
WEST VIRGINIA: CHARLESTON-KANAWHA CO. ARPT-RADIO: CAA ILS LOM operg test basis only. Freq: 245 kc, ident CH.
CHARLESTON-KANAWHA CO. ARPT: Tfc on SW and SE ends of loading ramp and NC

(6-19-51)

WEST VIRGINIA: hangar area not ctld by twr. Equip. SE side Rnwy 5-23, and crossing Rnwy 14-32 days, mrkd. (5-21)
MARTINSBURG-RADIO: Omnirng gnd checked only. (4-6)
MORGANTOWN-RADIO: Soon LF rng flgt-checked, crss correctly aligned. Multiples and fades all crss. June 18, omnirng shut down until approx Sept 14 - relctn.
PARKERSBURG-RADIO: SW course VHF visual-aural rng slightly rough.
WHEELING-RADIO: Soon CAA ILS LMM will be commd. Freq: 230 kc, ident: LG. (6-8)
WHEELING-OHIO CO. ARPT: Turf area clsd. Equip. on fld days. Use rnwys, taxiways only. (5-18)
WISCONSIN: BURLINGTON-WERELY FLD: June 14 - July 11, fld will be clsd. (6-14)
DRUMMOND-SORENSEN ARPT: Clsd ngts. N/S Strip under const. (5-15)
LA CROSSE-RADIO: Omnirng radials between 314° and 331° unreliable 20 to 30 mi from rng.
MADISON ARPT: Rnwys 18-36, 13-31 clsd. Open ditches apch end Rnwys 4 and 36. Rnwy 4-22 shortened to 5940'. SW taxiway clsd 0700-1800 daily and barricaded at E end. Equip. on fld days. Sod unsafe. Due to non-visibility twr unable to ctl tfc on SE ramp. (6-11)
MILWAUKEE-RADIO: June 4, Kenosha FM on S crs shut down until approx June 25 - relctn to lat 42-33-08, long. 97-53-36. (6-4)
MILWAUKEE GENERAL MITCHELL FLD: Formation take-offs prohibited on all rnwys except 1-19, which will be allowed by ctl twr. Rgt turn procedure rstd to locally based acft. Rnwy 18-36, 2300' long open to lgt acft days only. (5-28)
PHILLIPS ARPT: Ctn-const. Only 2000' E end E/W Strip avail. Ctn-taxying to bldgs W side of arpt. (5-15)
WYOMING: CASPER-RADIO: Omnirng radials between 10° and 35° from stn unusable at min inst alt. beyond 35 mi.
DOUGLAS-RADIO: June 11, omnirng shut down until approx Aug 11 - modernization (6-10)
GILLETTE ARPT: 50 to 75' W shoulder extending 1500' from N end N/S Strip soft. Soft portion clsd to hvy acft. (6-11)
MOORCROFT-RADIO: Omnirng shut down until approx June 23 - modernization. (5-15) About July 3, voice fac on 278 kc will be commd. Concurrently rcvg watch on 3105 kc will be established. (6-12)
LANDER ARPT: Ctn-const. Use NNE/SSW Strip only. (6-14)
NEW CASTLE-MONDELL ARPT: New NW/SE Strip under const. Equip. on fld days. Lnd own risk. (5-14)
ROCK SPRINGS-RADIO: About July 9, omnirng will be shut down until approx Sept 9 - modernization. (6-15)
ROCK SPRINGS ARPT: 0800-1700 const on taxiways adjoining rnwys, mrkd. (6-12)

MINIMUM EN ROUTE INSTRUMENT ALTITUDE AMENDMENTS: Effective June 20, 1951, unless otherwise advised, minimum en route instrument altitudes are amended as follows:

(1) Green Civil Airway No. 3 is amended to read in part:

FROM	TO	MIN ALT.
Omaha, Neb. (LFR)	Des Moines, Iowa (LFR)	2,600

(2) Green Civil Airway No. 4 is amended by adding:

Pittsburgh, Pa. (VOR)	Int. S crs Altoona, Pa. (LFR) & Pittsburgh, Pa. (VOR) radial 95	4,500
Int. S crs Altoona, Pa. (LFR) & Pittsburgh, Pa. (VOR) radial 95	Harrisburg, Pa. (VOR) via radial 279	4,000

(3) Green Civil Airway No. 5 is amended to read in part:

Midland (Int), Texas	Big Spring, Texas (LFR)	4,000
Midland, Texas (VOR) via VOR radials 40 or 55	Big Spring, Texas (VOR) via VOR radials 236 or 251	4,300
Smithville, Tenn. (LFR)	Watts (Int), Tenn.	4,500
Watts (Int), Tenn.	Knoxville, Tenn. (LFR) (Westbound)	4,500
	(Eastbound)	3,000

(4) Amber Civil Airway No. 7 is amended by adding:

Presque Isle, Me. (LFR)	U. S. Canadian Boundary	3,500

(5) Red Civil Airway No. 3, is amended by adding:

Philipsburg, Pa. (VOR) via direct en route radials	Harrisburg, Pa. (VOR) via direct en route radials	4,000

(6) Red Civil Airway No. 11 is amended by adding:

Elmira, N. Y. (VOR) Via direct en route radials	Binghamton, N. Y. (VOR) Via direct en route radials	3,500

(7) Red Civil Airway No. 18 is amended by adding:

Elkins, W. Va. (VOR) Via VOR direct radials or radial 105	Front Royal, Va. (VOR) Via VOR direct radials or radial 258	6,800

(8) Red Civil Airway No. 20 is amended by adding:

Pittsburgh, Pa. (VOR) Via radial 122	*Int. NE crs Morgantown, W. Va. (LFR) & Pittsburgh, Pa. VOR radial 122	2,600

4,000' - Minimum crossing altitude at Int. NE crs Morgantown (LFR) & Pittsburgh VOR radial 122, southeastbound

Int. NE crs Morgantown, W. Va. (LFR) & Pittsburgh, Pa. (VOR) radial 122 Via radial 122	Int. S crs Altoona, Pa. (LFR) & Pittsburgh, Pa. (VOR) radial 122	4,500
Int. S. crs Altoona, Pa. (LFR) & Pittsburgh, Pa. (VOR) radial 122	Martinsburg, W. Va. (VOR) Via radial 303	4,000

(9) Red Civil Airway No. 22 is amended by adding:

Selfridge, Mich. (LFR)	Int. SE crs Selfridge, Mich. (LFR) & W crs Clear Creek (LFR), Ont. Can.	1,700

(10) Red Civil Airway No. 26 is amended by adding:

Syracuse, N. Y. (VOR) Vii direct radials	Binghamton, N. Y. (VOR) Via direct radials	3,500
Binghamton, N. Y. (VOR) Via direct radial	Wilkes Barre, Pa. (LFR)	3,500
Wilkes Barre, Pa. (LFR)	Allentown, Pa. (VOR) Via direct radial	4,000

(11) Red Civil Airway No. 27, is amended by adding:

Atlanta, Ga. (LFR)	Murphy, Tenn. (Rbn) (Northbound)	7,000
	(Southbound)	6,000
Murphy, Tenn. (Rbn)	Knoxville, Tenn. (LFR)	7,000

(12) Red Civil Airway No. 28 is amended to read in part:

Lansing, Mich. (LFR)	Int. W crs Salem, Mich. (VAR) & direct crs Lansing-Willow Run, Mich. (LFR)	2,500
Int. W crs Salem, Mich. (VAR) & direct crs Lansing-Willow Run, Mich. (LFR)	Willow Run (LFR), Mich.	2,300

(13) Red Civil Airway No. 29 is amended by adding:

Elmira, N. Y. (VOR) Via direct en route radial	Williamsport, Pa. (LFR)	4,000
Williamsport, Pa. (LFR)	Selinsgrove, Pa. (VOR) Via direct radial	3,500
Selinsgrove, Pa. (VOR) Via direct radial	Harrisburg, Pa. (VOR) Via direct radial	3,500
Harrisburg, Pa. (VOR) Int. NE crs Arcola, Va. (LFR) & Harrisburg, Pa. (VOR) radial 174	Baltimore, Md. (VOR) Via radial 353	2,000
Lancaster, Pa. (Rbn) via Rbn	Allentown, Pa. (VOR) via direct radial	2,500

(14) Red Civil Airway No. 31 is amended to read:

Huron, S. D. (LFR)	Watertown, S. D. (LFR)	3,000

(15) Red Civil Airway No. 35 is amdned by adding:

Cassoday (Int), Kans.	Miller (Int), Kans.	2,600
Miller (Int), Kans.	Forbes, Kans.	2,300
Forbes, Kans. (LFR)	Int. NE crs Forbes, Kans. & S crs St. Joseph, Mo. (LFR)	2,400

(16) Red Civil Airway No. 69 is amended to read in part:

Midland, Texas (LFR)	Int. NE crs Midland, Texas (LFR) & W crs Big Spring, Texas (LFR)	4,300

(17) Red Civil Airway No. 76 is amended to read in part:

Auburn (Int), Calif.	Williams, Calif. (LFR) (Westbound)	4,000

(18) Red Civil Airway No. 95 is amended by adding:

Elmira, N. Y. (VOR) Via radial 57	Int. S crs Syracuse, N. Y. (LFR) & Elmira, N. Y. (VOR) radial 57	3,500

(19) Blue Civil Airway No. 2 is amended by adding:

Pittsburgh, Pa. (VOR) via direct radial	Morgantown, W. Va. (LFR)	3,000

(20) Blue Civil Airway No. 3 is amended by adding:

Grand Rapids, Mich. (LFR)	Int. 007° mag. bearing from Grand Rapids, Mich. (LFR) & NE crs Muskegon, Mich. (LFR)	2,200
Int. 007° mag. bearing from Grand Rapids, Mich. (LFR) & NE crs Muskegon, Mich. (LFR)	Cadillac, Mich. (Rbn)	2,600
Cadillac, Mich. (Rbn)	Traverse City, Mich. (LFR)	2,500
Traverse City, Mich. (LFR)	Pellston, Mich. (Rbn)	2,300
Pellston, Mich. (Rbn)	Sault Ste Marie, Mich. (LFR)	2,000

(21) Blue Civil Airway No. 39 is amended by adding:

Philipsburg, Pa. (VOR) Via direct radial	Elmira, N. Y. (VOR) Via direct radial	4,500

(22) Blue Civil Airway No. 62 is amended by adding:

Saginaw, Mich. (Rbn)	Gladwin, Mich. (Rbn)	2,000
Gladwin, Mich. (Rbn)	Traverse City, Mich. (Rbn)	

(23) Blue Civil Airway No. 82 is added to read:

Lebo, Kans. (LFR)	Forbes, Kans. (LFR)	

(24) Direct Routes - Northeast United States is amended by adding:

Elmira, N. Y. (VOR) Via direct radial	Syracuse, N. Y. (VOR) Via direct radial	3,500
Philipsburg, Pa. (VOR) Via direct radial	Int. E crs Pittsburgh, Pa. (LFR) & W crs Altoona, Pa. (LFR)	4,500
Bradford, Pa. (Rbn)	Elmira, N. Y. (VOR) via direct radial	4,500
Bellemeade (Int), N. J.	Chatham, N. J. (Rbn)	2,000
Chatham, N. J. (Rbn)	Paterson, N. J. (Rbn)	2,000

(25) Direct Routes - Northeast United States is amended to eliminate:

Sault Ste Marie, Mich.	Traverse City, Mich.	2,500
Traverse City, Mich.	Grand Rapids, Mich.	3,000
Traverse City, Mich.	Saginaw, Mich.	2,500

(26) Direct Routes - Southeast United States is amended by adding:

Atlanta, Ga. (LFR) Via LFR direct	Columbus, Ga. (VOR) Via VOR direct	2,900
Columbus, Ga. (VOR) Via VOR direct	Maxwell, Ala. (LFR) Via (LFR) direct	2,000

(6-19-51)

GOOD OPERATING PRACTICES

A comprehensive analysis of air traffic incidents which occurred in 1949 reveals that traffic conflictions occurred quite frequently when no one had violated any specific air traffic rule. Such conflictions might be reduced by writing more rules, but there is serious doubt as to the practicability of writing more rules when many of our air traffic problems are due to difficulty in applying existing rules. Furthermore, it is extremely unlikely that air traffic rules can ever be written so as to eliminate the need for good judgment in the planning and conduct of every flight.

Conformance with the following Good Operating Practices will greatly reduce traffic conflictions:

1. Use reasonable restraint in exercising the prerogatives of VFR flight, especially in terminal areas.

   The weather minimums and distances from clouds are minimums. Giving yourself a greater margin in specific instances is just good judgment.

   a. Conducting a VFR operation in a control zone when the official visibility is 3 or 4 miles is not prohibited, but good judgment would dictate that you keep out of the approach area.

   b. It has always been recognized that precipitation reduces forward visibility. Consequently, although again it may be perfectly legal to cancel your IFR flight plan at any time you can proceed VFR, it is good practice, when precipitation is occurring, to continue IFR operation into a terminal area until you are reasonably close to your destination.

   c. In conducting simulated instrument flights, be sure that the weather is good enough to compensate for the restricted visibility of the safety pilot or your greater concentration on your flight instruments. Give yourself a little greater margin when your flight path lies in or near a busy airway or close to an airport.

2. Be alert at all times, especially when the weather is good.

   Most pilots pay attention to business when they are operating in full IFR weather conditions, but strangely, air collisions almost invariably have occurred under ideal weather conditions. Unlimited visibility appears to encourage a sence of security which is not at all justified.

3. If you think another aircraft is getting too close to you, give way instead of waiting for the other pilot to respect the right-of-way to which you may be entitled.

   It is a lot safer to pursue the right-of-way angle after you have completed your flight.

4. Plan and conduct an IFR operation unless the weather is well above VFR minimums.

   When a flight cannot be completed safely under Visual Flight Rules is strictly a matter of judgment. Good judgment would dictate that you use this prerogative very conservatively.

5. Use the Federal Airways.

   The establishment of the Federal Airways system costs the Government millions of dollars annually. The operation and maintenance of the system costs additional millions every year. Sure, you can stay off the airways most of the time during certain flights by electing to fly "direct," but why ignore the additional safety available in controlled airways?

6. Follow IFR procedures even when operating VFR.

   You don't have to follow IFR procedures if you are conducting a VFR operations, but you cannot maintain instrument proficiency without practicing at every opportunity. Use all the navigational aids available and make accurate position reports.

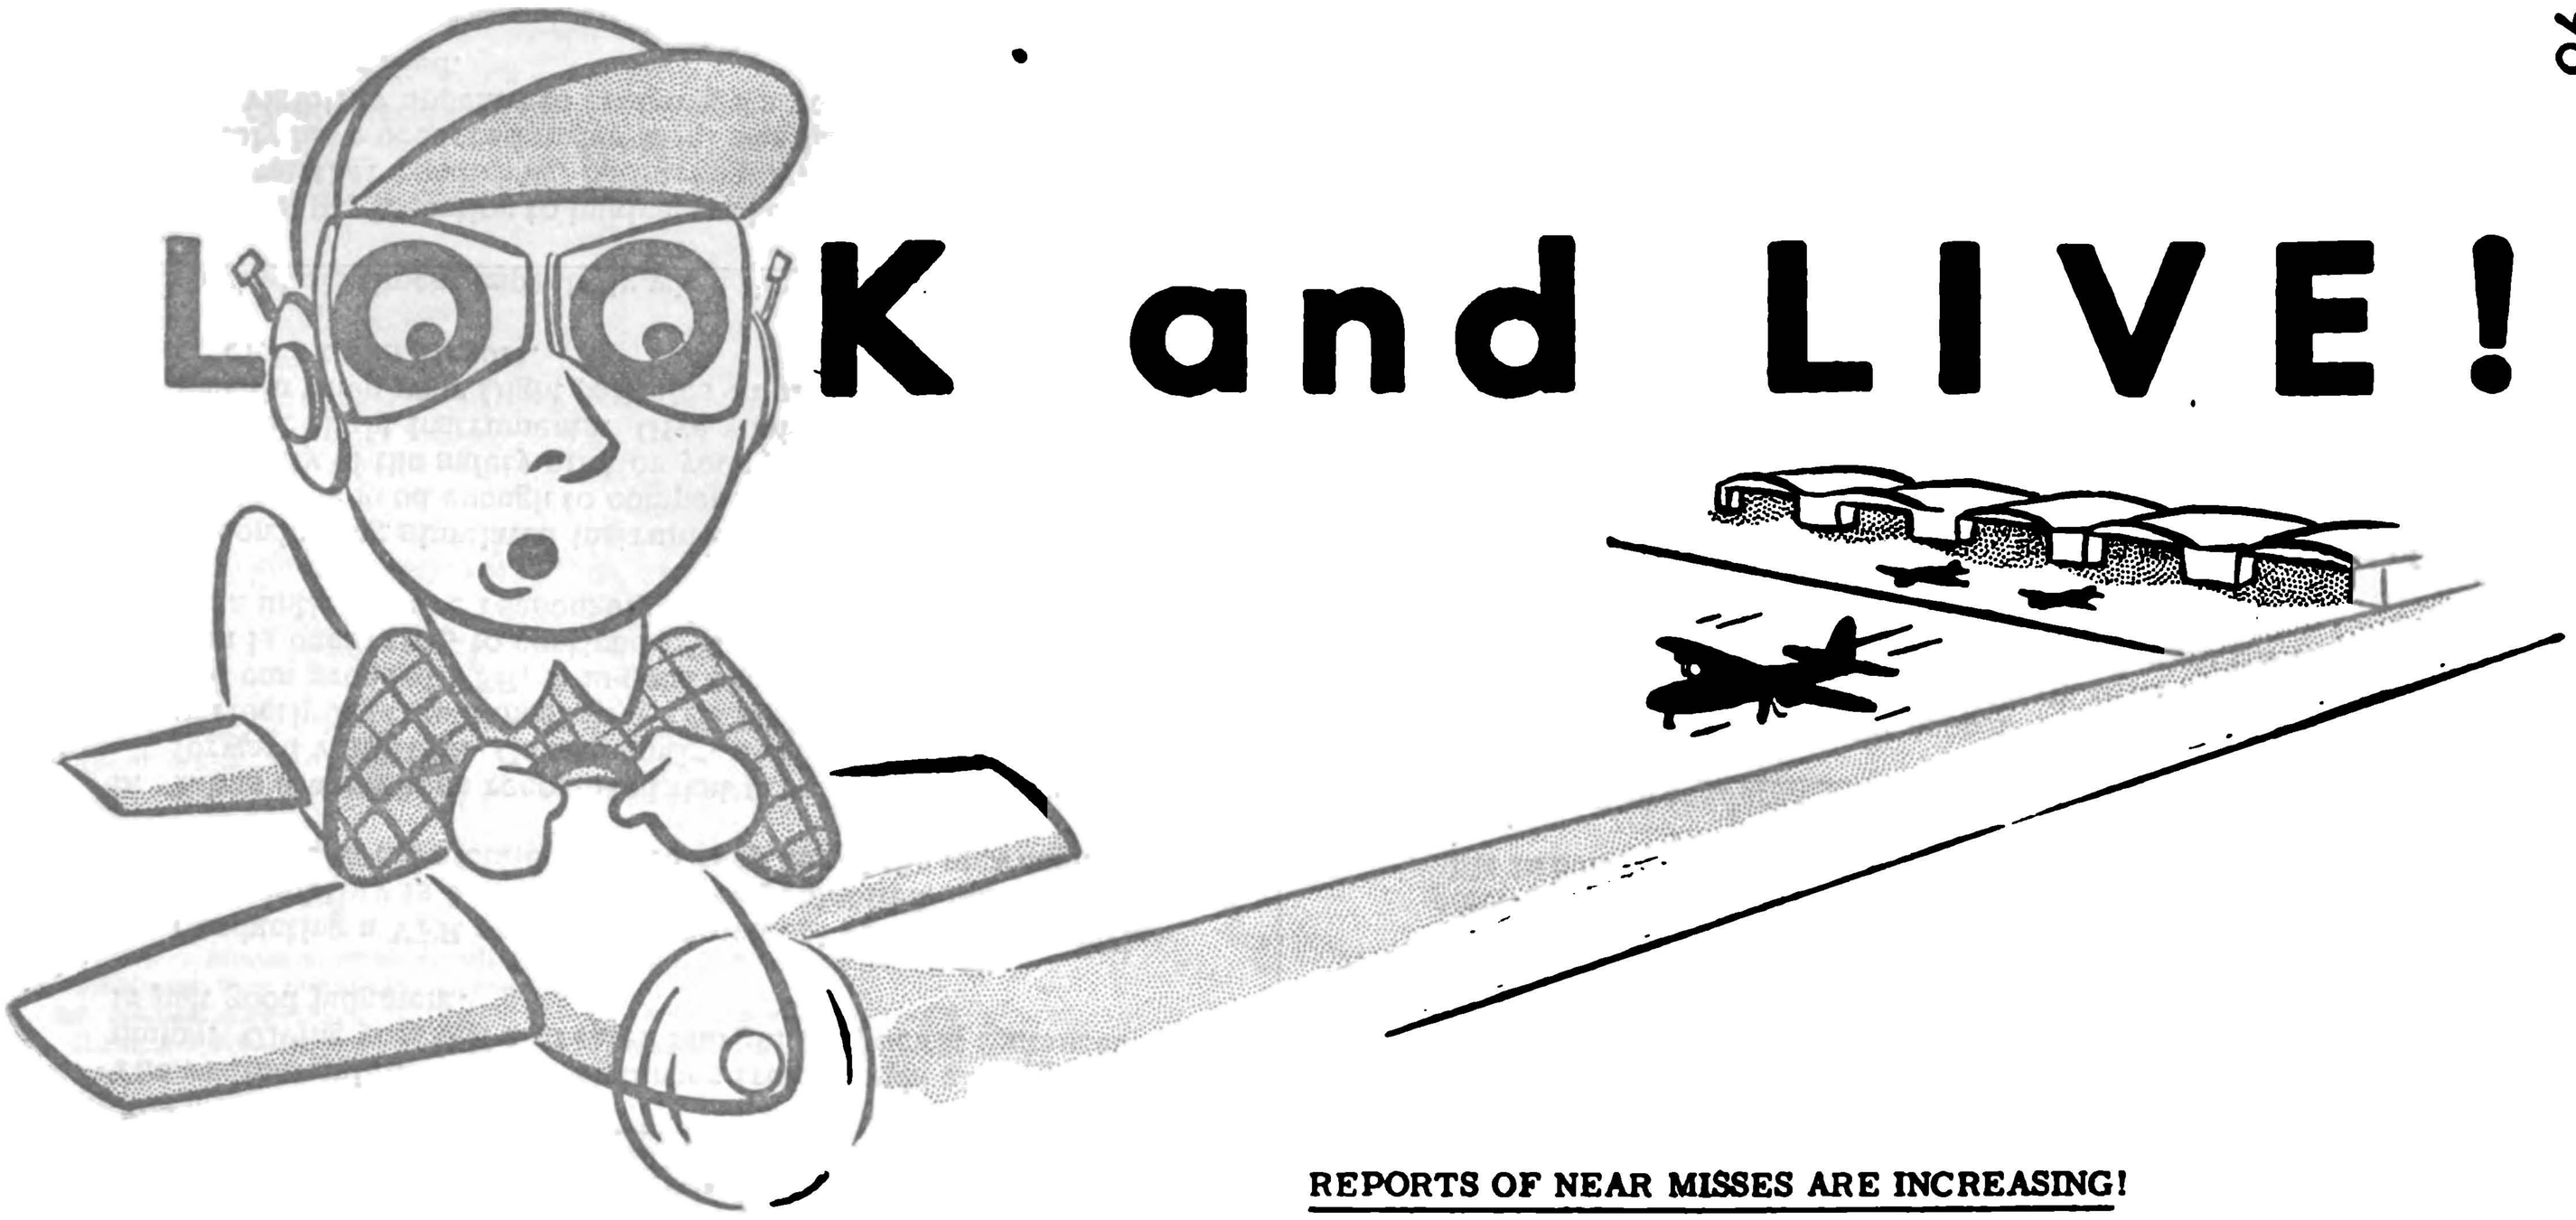
7. When conducting an IFR operation, make a written record of your ATC clearance.

   The specified conditions which are a part of your air traffic clearance may be somewhat different from those included in your flight plan. Additionally, air traffic control may find it necessary to add conditions, such as a particular departure route. The very fact that air traffic control specifies different or additional conditions means that other aircraft are involved in the traffic situation.

Conformance with the above Good Operating Practices is not as simple as it sounds. It requires constant attention to innumerable details and a deep-seated realization that additional hazards incident to flight operations exist whenever vigilance is relaxed.

(6-19-51)

LOOK and LIVE!



REPORTS OF NEAR MISSES ARE INCREASING!

AN IFR FLIGHT PLAN WILL NOT GUARANTEE SEPARATION FROM UNCONTROLLED TRAFFIC WHEN THE WEATHER IS "VFR".

VFR TRAFFIC CLIMBING OR DESCENDING MAY FLY THROUGH YOUR ALTITUDE!

BE ALERT AT ALL TIMES FOR OTHER TRAFFIC.

KEEP TO THE RIGHT! PARTICULARLY IN CONGESTED AREAS AND WHEN CLIMBING OR DESCENDING; UNLESS OTHERWISE DIRECTED BY AIR TRAFFIC CONTROL.

REMEMBER YOUR CLOSING SPEED WITH AN APPROACHING AIRCRAFT MAY BE 10 MILES PER MINUTE!

WHEN VFR, FLY AT ALTITUDES PRESCRIBED IN C. A. R. PART 60.

(6-19-51)

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communicafions Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.
NOTE: See OMNIRANGE USE. page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
↙ = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS . . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z . . . . VHF station location marker at a range station.

RADIOTELEGRAPH CODE

A - ABLE	•—	F - FOX	••—•	K - KING	—•—	P - PETER	•——•	U - UNCLE	••—	Z - ZEBRA	——••

FREQUENCY LEGEND

V· = 135.9,135.0 and 111.1 mc transmitted.
= Guards same VHF frequencies station transmits except 111.1 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic in bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associatcd LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(7-2-51)

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR.
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).
PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.
SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR the weather minimums for this type of approach must be equal to, or better than the regular (R) minimums as listed in Flight Information Manual for the airport.
CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

STATION	TRANSMITS	WEA. MINIMUMS Alt MSL	Ceiling	Visibility	HOURS OF OPERATION REMARKS, ETC.

AIR FORCE GCA UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL AIR FORCE UNITS TRANSMIT ON AND GUARD THE FOLLOWING CHANNELS (FREQUENCIES): B=126.18; C=137.88; D=121.5; G=136.80; H=134.1; 142.02 mc; 3475, 4890 and 6640 kc.

STATION	Alt MSL	Ceiling	Visibility	HOURS OF OPERATION REMARKS, ETC.
Andrews AFB, Md.	529	250	1(D)1½(N)	Cont. 142.38
Barksdale AFB, La.	417	250	1(D)1½(N)	Cont IFR; 10-23 daily; 30 min notice other hrs.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.
Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.
Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.
Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
Alt MSL=Min. alt. over airport.
(D) = Day. (N) = Night. → = New or revised data. ✓ = New facilities or name changes.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitivity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
1 - Portable lights (Electrical)
2 - Boundary
3 - Runway floods
4 - Runway or Strip
5 - Instrument approach (neon)
6 - High intensity runway
7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "NACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blind" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY:
Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...xmit 135.90 rcvg 135	1...135.90			CAA Airway (Range Station)

121.5				Military emergency

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) AL-410, dtd Oct. 20, 50. Moffett NAS, Mountain View, Calif. Change LF rng freq from 323 kc to 322 kc.

(2) AL-414, dtd Jan. 28, 51. McChord AFB, Tacoma, Wash. Change - Shuttle: W side S crs between rng and a point 2 minutes S. Non-standard elliptical pattern, all turns left. Min. Alt. 4000' within 10 mi. Change - Missed approach to: If visual ctc not established at authorized landing minimums within 7.2 mi after passing McChord rdo rng, or if landing not accomplished, climb to 2000' on N crs within 5 mi of McChord AFB, return to McChord rng and shuttle to 4000' on W side S crs between rng and a point 2 minutes S not to exceed 10 mi. Non-Standard elliptical pattern, all turns left.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous condition, reporters should utilize the CAA Airway Communications Stations.

(7-2-51)

The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian terriroty.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

VHF OMNITEST SIGNAL FACILITIES: Experimental VHF omnitest signal facilities have been installed at the New York (LaGuardia 112.0 mc), Chicago (Midway 112.0 mc), and Kansas City (Municipal 113.0 mc) airports. These facilities cannot be used for navigational purposes but permit checking of aircraft navigational VOR receivers during a ramp test or while in flight near the airport. Voice communication is not available on the test signal frequency. The facility radiates a 0° course in all directions with a power output of about 10 watts. The identification consists of continuous dots without voice. Each facility is continuously monitored and will shut down automatically if the 0° course varies by more than one degree from normal or in case the identification fails. Flight checks indicate that the omnitest signal is usable to a distance of about ten miles at minimum instrument altitudes although regions of weak and unreliable signal may be encountered at shorter distances. The omnitest signal may be regarded as dependable when there is no flag alarm showing or where no flag alarm is incorporated in the aircraft unit and the identification is received free from interference and noise. Comment from airmen will be appreciated. Please forward same to: Civil Aeronautics Administration, Washington 25, D. C., Attention: W-380.

RECEIVER OMNITEST PROCEDURE - Receivers with omni-Bearing Selectors (OBS)

Tune in omnitest frequency. The "To-From" indicator should read "To" or "From" and the alarm flag, if one is used, should disappear.

Set OBS in vicinity of 0° to center "Deviation" indicator. The "To-From" indicator should read "From" and the difference between 0° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

Set OBS in vicinity of 180° to again center "Deviation" indicator. The "To-From" indicator should read "To" and the difference between 180° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

With the "Deviation" indicator centered in the 180° position rotate OBS clockwise until "Deviation" indicator reads full scale or five dots to left. Note OBS reading. Next rotate OBS counterclockwise until "Deviation" indicator reads full scale or five dots to right. Note OBS reading. The difference between the two OBS readings is a measure of receiver course sensitivity.

If instrumentation includes a radio magnetic indicator (RMI), the pointer on this instrument connected to the receiver being checked should be observed. This pointer should indicate 180° + 1 degree regardless of the setting of the OBS.

AUTOMATIC INDICATING RECEIVERS: Automatic indicating receivers do not have an Omni-Bearing Selector or a "To-From" indicator and have no ambiguity. The only course that can be checked is the one indicated when the equipment is receiving the 0° (Magnetic north) radial from the station, which is automatically indicated when the receiver is turned on and tuned to the correct signal frequency. Either 0° or 180° will be indicated depending on the sensing designed into the particular receiving equipment (as described in the instruction book for that equipment).

✓DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed:

Radio Call	Frequency
Albuquerque Center	120.3 mc
Atlanta Center	120.3 mc
Boston Center	120.3 mc
Chicago Center	120.3 mc
Cincinnati Center	120.3 mc
Cleveland Center	120.3 mc
Denver Center	120.3 mc
Detroit Center	118.9 mc
Ft. Worth Center	120.3 mc
Kansas City Center	120.3 mc
New York Center	118.9,120.7 mc
Oakland Center	120.3 mc
Pittsburgh Center	118.9 mc
St. Louis Center	118.9 mc
Salt Lake City Center	120.3 mc
San Antonio Center	120.3 ,137.88 mc
Seattle Center	120.3 mc
Washington Center	119.7,120.3,135.0,135.9,136.8,132.3 mc

✓FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no flights into or over foreign territory shall be made without authorization from the foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtin countries.

FLIGHT INFORMATION MANUAL: A new edition of this manual has been prepared and is now being printed. This issue, Volume 5, Number 2, will supersede that dated August 1, 1950, and should be ready for distribution to subscribers shortly after July 15.

AERONAUTICAL ADVISORY STATIONS (FREQUENCY 122.8 mc): This frequency is known in some areas as the "private flyers frequency" and also as "UNICOM". Licenses for ground stations and aircraft are now being issued by the FCC subsequent to receipt of application for license from private pilots and airport operators eligible to use the frequency. Under the FCC rules, private aircraft may use 122.8 mc for communication with aeronautical advisory stations and between private aircraft themselves while in flight. Particular attention is invited to Section 9.1001 which follows:

"9.1001 Eligibility for Station License. Authorization for aeronautical advisory stations will be issued only to the owner or operator of a landing area, not served by an airdrome control station. Only one Aeronautical Advisory station will be authorized at a landing area."

The scope of service to be rendered under FCC rules for the ground station is: "9.1004 Scope of Service. (a) Communications shall be limited to the necessities of safe and expeditious operation of aircraft. The service shall be advisory in nature, pertaining to the condition of runways, types of fuel available, wind conditions, available weather information or other information necessary for aircraft operations. (b) Aeronautical Advisory stations shall not be used for the control of aircraft."

Airport operators interested in providing this service may obtain further details from the nearest FCC or CAA field office.

DVFR FLIGHT PLANS: When an IFR flight plan is canceled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

ON REQUEST REPORTING POINT: Effective immediately, the Anderson, S. C. Rbn is established as a on-request reporting point.

INSTRUMENT APPROACH PROCEDURES: The standard instrument approach procedure for the following airport has been CANCELLED: effective June 1, 1951: VHF Radio Range (VAR): Topeka, Kans., Phillip Billard.

DANGER AREA DESIGNATIONS: The following Danger Area amendments shall be effective as dated, unless otherwise advised:

(AMENDMENT NO. 75 (July 6, 1951)

A Townsend, Georgia area is added to read: Location: TOWNSEND (Jacksonville Chart); Description: A circle with a radius of 3 miles, centered at lat. 31-32-50, long. 81-35-20; Altitudes: Surface to 30,000 ft.; Time: Daylgt hrs, 7 days a week; Using Agency: U. S. Air Force, Hunter AFB, Savannah, Georgia.

AMENDMENT NO. 76 (July 19, 1951)

(1) The South Wellfleet, Massachusetts area, published on March 6, 1951 in 16 F. R. 2051, is revised to read: Location: SOUTH WELLFLEET (Boston Chart); Description: Beginning at lat. 42-05-55, long. 70-02-10; southerly paralleling the shoreline at a distance of 3 nautical miles to lat. 41-48-30, long. 69-51-50; NW to the town of North Eastham, Mass.; northerly along the railroad to the town of South Wellfleet, Mass.; northerly to lat. 42-05-55, long. 70-02-10, point of beginning; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: Hdqs., 1st Army and 33rd Fighter Interceptor Wing, Otis AFB, Falmouth, Mass.

(2) The Matagorda Island, Texas area, published on November 10, 1950, in 15 F. R. 7548, and revised on April 17, 1951, in 16 F. R. 3333, is further revised by deleting AREA I. AREAS II and III become AREAS I and II respectively.

(3) The Pendleton, Va. Area, published on April 21, 1949, in 14 F. R. 1913, is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 36-50-41, long. 75-54-40; southerly paralleling the shoreline at a distance of 3 nautical miles to lat. 36-34-33, long. 75-48-40; NW to lat. 36-45-05, long. 75-56-10; clockwise along the arc of a circle with a radius of 2 nautical miles centered at lat. 36-46-48, long. 75-57-24 to lat. 36-48-33, long. 75-56-10; NE to lat. 36-50-41, long. 75-54-40; point of beginning.

(4) A Eureka, Washington area is added to read: Location: EUREKA (Spokane Chart); Description: N boundary: lat. 46-23-12; S boundary: lat. 46-21-18, E boundary: long. 118-53-30; W boundary: long. 118-55-30; Altitudes: Surface to 20,000 ft.; Time: Daylgt hrs only, 7 days a week; Using Agency: Organized Naval Reserve, Naval Air Station, Spokane, Wash.

(5) The Camp Tortuguero, Puerto Rico, area, published on June 19, 1951 in 16 F R. 5834, is deleted.

NON-STANDARD HOLDING PATTERNS: Effective immediately, the following non-standard holding patterns are established or revised:

(1) WASHINGTON ADF, hold between Washington rng and Mt. Vernon MH; Direction of turn: LEFT; Time: 2 minutes.

(2) FT. FOOTE (Washington ILS OMK); Direction from holding point - W; Direction of turn: LEFT on W side S crs Washington ILS lclzr; Time: 2 minutes.

(3) HAINES POINT ADF, between Riverdale MH and ILS LMM; Direction of turn: LEFT, Time: 2 minutes.

(4) ARCOLA, Direction from holding point: SW; Direction of turn: Right on W side of SW crs; Time: 2 minutes.

(5) RIVERDALE MH, Direction from holding point: NE; Direction of turn: Right on W side of NE crs Washington (inbound 214°); Time: 1 minute.

CORRECTIONS TO FLIGHT INFORMATION MANUAL: Correct Flight Information Manual, Vol 5, No. 1, dated August 1, 1950 as follows:

(1) Page 14. Add New Midland, Texas INSAC phone : 4-8802.

(2) Page 11. Change New Orleans, La. WB and INSAC number as follows: WB - KE-4-2529; CAA INSAC: KE - 4-4166. Change Lafayette, La. CAA INSAC telephone number to: 8-3752.

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (3-19)
ANNISTON-RADIO: Omnirng gnd-checked only. (4-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions.
BIRMINGHAM-RADIO: June 25, omnirng shut down until approx Sept. 22 - relctn.
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. (5-23) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE)-TOWER: USAF GCA will not be avail July 16 to Sept. 15. (6-11)
FLD: Acft making VFR descent to Brookley under low visibility conditions will letdown S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
EVERGREEN-RADIO: June 5, omnirng shut down until approx July 20 - modernization.
MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng crs have multiples 20 mi from stn. (5-10)

[redacted]: MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20) Rnwy 5-23 clsd (const). (5-7)
MONTGOMERY-RADIO: A maximum of one half degree in excess of allowable error will be found in E sector between radials 90° and 118°. (6-14)

(3) Red civil airway No. 12 control areas (Kansas City, Mo. to Williamsport, Pa.) is amended by deleting the portion which reads as follows: "And from the Naperville, Ill. omnirng stn to the South Bend, Ind. omnirng stn via the intsxn of the Naperville omnirng 69° true and the South Bend omnirng 287° true enroute radials".

(4) Red civil airway No. 14 control areas (Lone Rock, Wis. to Huntington, W. Va.) are amended by deleting the portion which reads: "From the Chicago Heights, Ill. omnirng stn to the Lafayette, Ind. omnirng stn via the direct enroute and 15° NE and SW alt change radials" and by substituting the following in lieu thereof: "From the intsxn of the Chicago Heights omnirng 333° true enroute radial and the Chicago-Midway ILS lclzr crs to the Chicago Heights omnirng stn via the Chicago Heights omnirng 333° true enroute radial; from the Chicago Heights, Ill. omnirng stn to the Lafayette, Ind. omnirng stn via the direct enroute and 15° NE and SW alt change radials;"

(5) Red civil airway No. 22 control areas are amended by changing caption to read: (Mt. Clemens, Mich. to Albany, N. Y.)

(6) Red civil airway No. 27 control areas (Atlanta, Ga. to Detroit, Mich.) is amended by deleting the last portion of present control areas which reads: "and from the Toledo, Ohio omnirng stn via the Toledo-Lansing direct enroute radial to its point of intsxn with the W crs of the Detroit, Mich. rdo rng, including all that area bounded on the SW by the Toledo-Lansing direct enroute radial, on the N by the Detroit-Litchfield direct enroute radial and on the SE by the Detroit-Fort Wayne direct enroute radial."

(7) Red civil airway No. 28 control areas (Rockford, Ill. to Detroit, Mich.) All of Red civil airway No. 28 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Janesville, Wis. omnirng stn to the intsxn of the Janesville omnirng 112° true enroute radial and the Chicago Heights omnirng 340° true enroute radial, including all that area bounded on the S by Red 28, on the NW by Red 57 and on the NE by the Janesville omnirng 112° true enroute radial. From the Naperville omnirng stn to the intsxn of the Naperville omnirng 69° true and the South Bend, Ind. omnirng 287° true enroute radials via the Naperville omnirng 69° true enroute radial. From the Lansing, Mich. omnirng stn to the Detroit, Mich. omnirng stn via the direct enroute and 15° N alt change radials.

(8) Red civil airway No. 29 control areas (Rochester, N. Y. to Baltimore, Md.) are amended by deleting the portion which reads: "including all that area bounded on the E by Red civil airway No. 29, on the SW by the Elmira-Williamsport direct enroute radial and on the NE by the Elmira-Wilkes Barre direct enroute radial."

(9) Red civil airway No. 31 control areas (Denver, Colo. to Minneapolis, Minn.) are amended by changing the first sentence, in part, to read: "All of Red civil airway No. 31 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Cheyenne, Wyo. omnirng stn"....

(10) Red civil airway No. 35 control areas (Pueblo, Colo. to St. Joseph, Mo.) are amended by changing the last portion starting from "Hutchinson, Kans. omnirng stn to Wichita, Kan. omnirng stn, etc" to read: "from the Hutchinson, Kans. omnirng stn to the Wichita, Kans. omnirng stn via the direct enroute radials including all that area bounded on the N by Red civil airway No. 35, on the E by Blue civil airway No. 5 and on the S by the Hutchinson-Wichita direct enroute radials; from the Hutchinson, Kans. omnirng stn to the Emporia, Kans. omnirng stn via the direct enroute and 15° N alt change radials."

(11) Red civil airway No. 55 control areas (Burlington, Iowa to Columbus, Ohio) are amended BEFORE the portion which reads: "From the South Bend, Ind. omnirng stn to the Millersburg, Ind. omnirng...." by ADDING the following portion to read: "From the intsxn of the Naperville omnirng 69° true enroute radial and the South Bend omnirng 287° true en-

route radial to the South Bend, Ind. omnirng stn via the South Bend omnirng 287° true enroute radial;"

(12) Red civil airway No. 62 control areas are amended to read: (Detroit, Mich. to Altoona, Pa.) All of Red civil airway No. 62 including all that area within 5 miles either side of the enroute radials from the Cleveland, Ohio omnirng stn to the Bergholz, Ohio non-directional rdo bcn via the Cleveland omnirng direct enroute radial.

(13) Red civil airway No. 81 control areas are amended to read: (Lansing, Mich. to Elkins, W. Va.) All of Red civil airway No. 81 including all that area within 5 miles either side of the enroute radials from the Lansing, Mich. omnirng stn to the Toledo, Ohio omnirng stn via the direct enroute radials."

(14) Red civil airway No. 100 control areas are amended to read: (Chicago, Ill. to Toledo, Ohio). All of Red civil airway No. 100 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Chicago Heights, Ill. omnirng stn to the Ft. Wayne, Ind. omnirng stn via the direct enroute and 15° S alt change radials; from the Ft. Wayne, Ind. omnirng stn to the Toledo, Ohio omnirng stn via the direct enroute radials.

(15) Red civil airway No. 104 control areas are amended to read: (Erie, Pa. to Elmira, N. Y.) All of Red civil airway No. 104.

(16) Blue civil airway No. 3 control areas (Tallahassee, Fla. to Sault Ste Maire, Mich.) are amended by deleting the words "from the Tallahassee, Fla. rdo rng stn to a point 25 mi N of the Pellston,Mich. non-directional rdo bcn" (airway will now read: "All of Blue 3 including all that area, etc)

(17) Blue civil airway No. 44 control areas (Advance, Mo. to U. S. Canadian Border) are amended by deleting the last portion which reads: "and from the Ft. Wayne, Ind. omnirng stn to the Toledo, Ohio omnirng stn via the direct enroute radials".

(18) Blue civil airway No. 50 control areas are amended to read: (Augusta, Me. to U. S. Canadian Border). All of Blue civil airway No. 50.

(19) Blue civil airway No. 84 control areas are added to read: (Bangor, Me. to Millinocket, Me.) All of Blue civil airway No. 84.

CONTROL AREA EXTENSIONS: (1) Control area extension (Santa Barbara, Calif.) is amended to read: From the Santa Barbara, Calif. rdo rng stn extending 5 mi either side of the N, W, and S courses of the Santa Barbara rdo rng to points 25 miles N, W and S of the rdo rng stn, and from the Santa Barbara, Calif. VHF rdo rng stn extending 5 miles either side of a line bearing 122° true from the Santa Barbara VHF rdo rng stn to a point 38 miles SE.

(2) Control area extension (Louisville, Ky.) is amended to read: All that area within a 15 mile radius of the Louisville omnirng stn excluding danger areas, and all that area within 5 miles either side of the 122° true radial of the Louisville omnirng extending from the omnirng stn to a point 25 miles SE, the area within 5 miles either side of the 154° true radial of the omnirng extending from the omnirng stn to a point 25 miles SE, and the area within 5 miles either side of the Louisville ILS lclzr crs extending from the lclzr to a point 13.2 mi SW.

(3) Control area extension (Alexandria, Minn.) is amended by adding the following to the present control area extension: "and all that area within 5 miles either side of the 50° true radial of the omnirng extending from the omnirng stn to a point 25 miles NE."

(4) Control area extension (Ft. Wayne, Ind.) is amended to read: All that area within a 15 mile radius of the Ft. Wayne omnirng stn including that area within 5 miles either side of the 318° true radial of the omnirng extending from the omnirng stn to a point 25 miles NW and that area within 5 miles either side of the Ft. Wayne ILS lclzr crs extending from the lclzr to a point 20 miles SE.

(5) Control area extension (Dickinson, N. Dak.) is amended by adding the following to the present control area extension: "and all that area within 5 miles either side of the 15° true radial of the omnirng extending from the omnirng stn to a point 25 miles NE."

(6) Control area extension (Lone Rock, Wis.) is amended by adding the following to the present control area extension: "including the area within 5 miles either side of the 24° true radial of the omnirng extending from the omnirng stn to a point 25 miles NE."

(7) Control area extension (Bismarck, N. Dak.) is amended by adding the following to the present control area extension: "and all that area within 5 miles either side of the 114° true radial of the omnirng stn extending from the omnirng stn to a point 25 miles SE."

(8) Control area extension (Chicago, Ill.) is amended to read: All that area within a 30 mile radius of the Chicago-Midway Arpt excluding the portion overlapping danger areas; all that area within a 15 mile radius of the Chicago Heights omnirng stn; all that area E of the Chicago Midway Arpt bounded on the NW by Red civil airway No. 38, on the E by Blue civil airway No. 6 and on the S by Red civil airway No. 12, and all that area SE of Chicago Midway Arpt bounded on the N by Red civil airway No. 12, on the E by Blue civil airway No. 6, on the S by Green civil airway No. 3 and on the W by Red civil airway No. 14."

(9) Control area extension (Evansville, Ind.) is amended by adding the following to the present control area extension: "and all that area within 5 miles either side of the 37° true radial of the omnirng extending from the omnirng stn to a point 25 miles NE".

(10) Control area extension (Jamestown, N. Dak.) is amended to read: All that area within a 15 mile radius of the Jamestown omnirng stn including the area within 5 miles either side of the 191° true radial of the omnirng extending from the omnirng stn to a point 25 miles S.

(11) Control area extension (Mansfield, Ohio) is amended to read: All that area within a 15 mile radius of the Mansfield omnirng stn including the area within 5 miles either side of the 130° true radial of the omnirng extending from the omnirng stn to a point 25 miles SE.

(12) Control area extension (Lansing, Mich.) is amended to read: All that area within a 15 mile radius of the Lansing omnirng stn including the area within 5 miles either side of the 232° True radial of the omnirng extending from the omnirng stn to a point 25 miles SW.

(13) Control area extension (Rochester, Minn.) is amended to read: All that area within a 15 mile radius of the Rochester omnirng stn including the area within 5 miles either side of the 222° true radial of the omnirng extending from the omnirng stn to a point 25 miles SW.

(14) Control area extension (Niagara Falls, N. Y.) is added to read: All that area within 5 miles either side of a direct line extending from the Niagara Falls ILS outer mrkr to the Dunkirk, N. Y. non-directional rdo bcn, excluding the portion which lies outside the continental U. S.

CONTROL ZONES: (1) 5 mile radius control zone section is amended by revoking the following airport: Langley Field, Va., Langley Field.

(2) Pembina, N. Dak. control zone is revoked.

(3) Langley AFB, Va. control zone is added to read: Within a 5 mile radius of Langley AFB and within a 5 mile radius of Patrick Henry Arpt, excluding the portion which overlaps danger areas.

(4) Fairbanks, Alaska control zone is amended to read: Within a 15 mile radius of Fairbanks International Arpt.

(5) Willmar, Minn. control zone is revoked.

(6) Truth or Consequences, N. Mex. control zone is added to read: Within a 5 mile radius of the Truth or Consequences Municipal Arpt extending 2 miles either side of the 13° true radial of the Hot Springs, N. Mex. omnirng extending from the omnirng stn to a point 10 miles N.

(7) Longview, Texas control zone is added to read: Within a 5 mi radius of Gregg Co. Arpt extending 2 miles either side of a track bearing 188° true from the Longview non-directional rdo bcn to a point 10 miles S.

REPORTING POINTS: (1) Green civil airway No. 2 (Seattle, Wash. to Boston, Mass.) is amended by deleting the following compulsory reporting point: Utica, N. Y. rdo rng stn.

(2) Amber civil airway No. 7 (Key West, Fla. to U. S. Canadian Border) is amended by deleting the following compulsory reporting point: Bangor, Me. rdo rng stn.

(3) Red civil airway No. 22 is amended to read: (Mt. Clemens, Mich. to Albany, N.Y.) The intsxn of the NE crs of the Buffalo, N. Y. rdo rng and the NW crs of the Rochester, N. Y. rdo rng; Utica, N. Y. rdo rng stn.

(4) Red civil airway No. 62 is amended by changing the caption to read: (Detroit, Mich. to Altoona, Pa.)

(5) Red civil airway No. 81 is amended by changing caption to read: (Lansing, Mich. to Elkins, W. Va.)

(6) Red civil airway No. 100 is amended by changing caption to read: (Chicago, Ill. to Toledo, Ohio).

(7) Red civil airway No. 104 is amended by changing caption to read: (Erie, Pa. to Elmira, N. Y.)

(8) Blue civil airway No. 3 is amended to read: (Tallahassee, Fla. to Sault Ste Marie, Mich.) Traverse City, Mich. rdo rng stn; Pellston, Mich. rdo rng stn.

(9) Blue civil airway No. 50 is amended to read: (Augusta, Me. to U. S. Canadian Border). Bangor, Me. rdo rng stn.

(10) Blue civil airway No. 62 is amended to read: (Ypsilanti, Mich. to Traverse City, Mich.) The Saginaw, Mich. non-directional rdo bcn.

(11) Blue civil airway No. 84 is added to read: (Bangor, Me. to Millinocket, Me.) No reporting point designation.

(7-2-51)

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.
NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
◤ = New facilities or name changes, see page 20.
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . .Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W. . . . Without voice facilities on range frequency
Z. . . . VHF station location marker at a range station.

RADIOTELEGRAPH CODE

A - ABLE	•—	F - FOX	••—•	K - KING	—•—	P - PETER	•——•	U - UNCLE	••—	Z - ZEBRA	——••

FREQUENCY LEGEND

V = 135.9,135.0 and 111.1 mc transmitted.
\# = Guards same VHF frequencies station transmits except 111.1 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1.

NOTES

1. Range courses are magnetic ~~in bearings~~.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(7-17-51)

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR.
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR, the weather minimums for this type of approach are at least as high as, and in some instances higher than, the regular circling minimums listed in the Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

Alt MSL=Min. alt. over airport.

(D) = Day. (N) = Night. → = New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

DIRECTORY OF AIRPORTS
LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U. S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U. S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport. If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

- h - runway is paved (concrete, asphalt or similar type of paving)
- aw - airway field
- (26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U. S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airmen Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AAF - Army Air Field
AFB - Air Force Base
CGAS - Coast Guard Air Station

NOTICES TO AIRMEN

SPECIAL NOTICES

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY:
Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE
A...xmit 135.90 rcvg 135	1...135.90	A...121.5	1...121.5	CAA Airway (Range Station) Military Emergency
B...126.18	2...142.74	B...142.74	2...142.74	Control towers

Z...110.3				"
ARMY				
126.18				Control towers
121.5				Military emergency

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

√ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec. 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous condition, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

(7-17-51)

REPLACEMENT OF 111.1 MC BY 122.2 MC: Use of 111.1 mc for INSAC reply to private aircraft was an interim measure pending availability of other channels. This frequency is now needed for navigational aids. Effective August 1, 1951, all INSACS will discontinue use of 111.1 mc for reply to private aircraft. The new channel for that purpose, 122.2 mc will be implemented at certain, but not all, INSACS on the same date. Until all INSACS transmit on 122.2 mc, pilots should consult the Guide and current NOTAMS for information on frequencies available at specific locations.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian terriroty.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.
